

APAN48 - Technology session

July 22, 2019

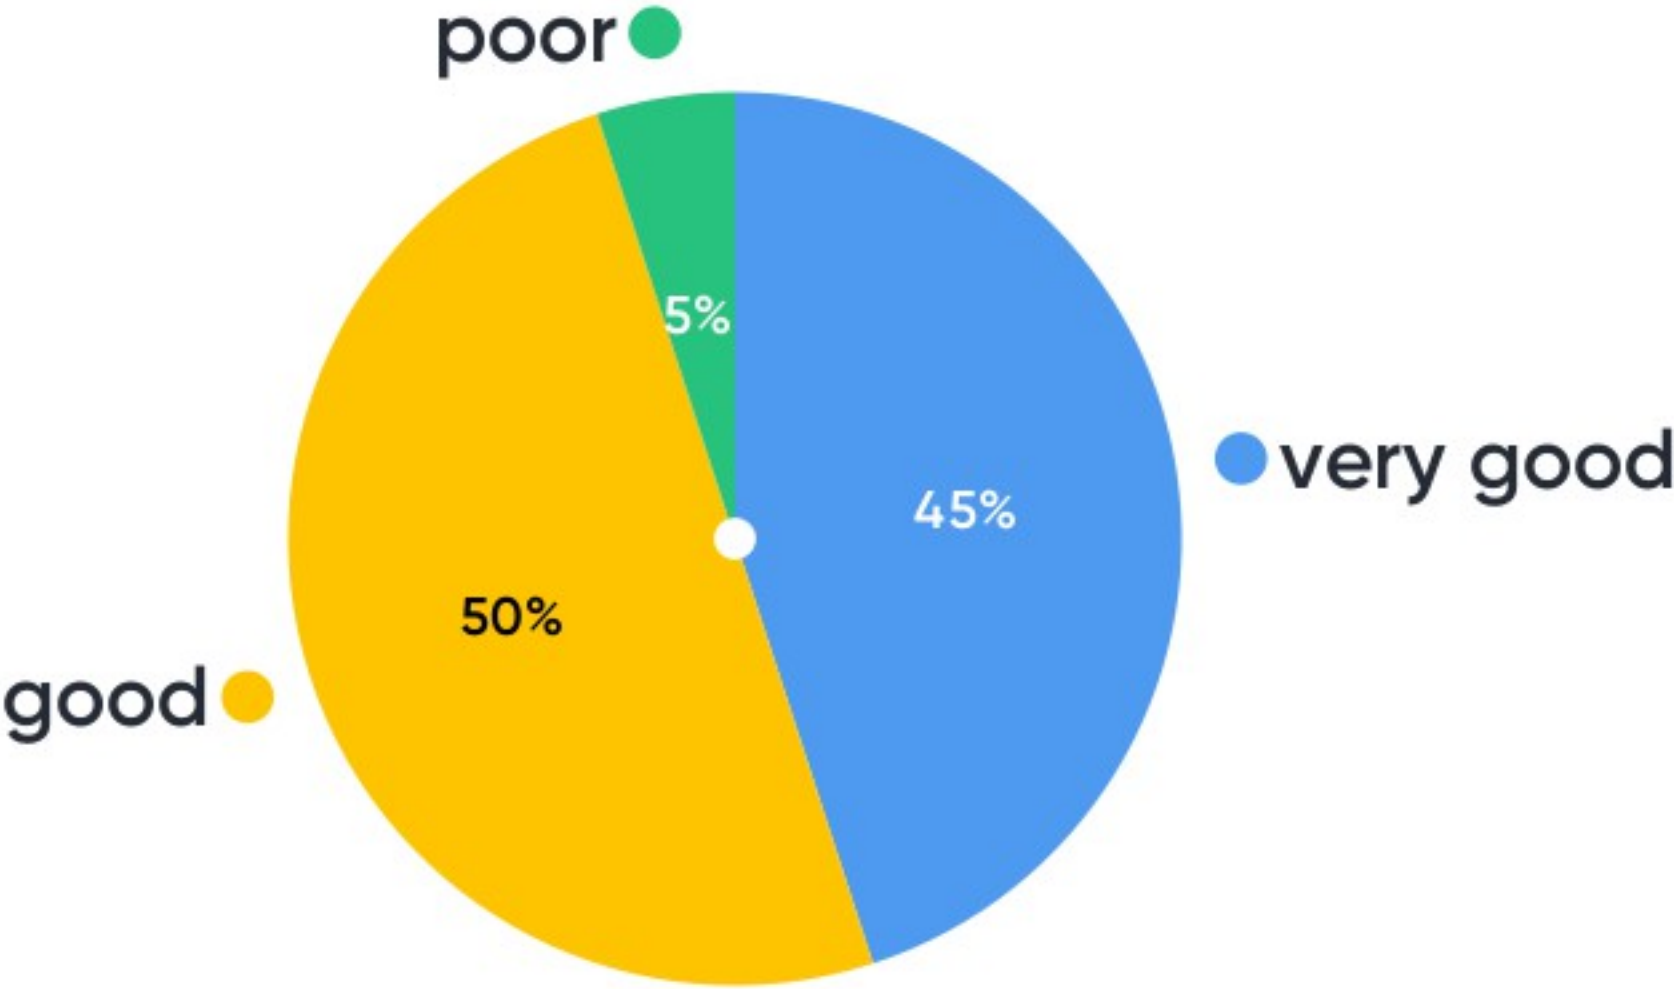

1. How was the image sharpness?

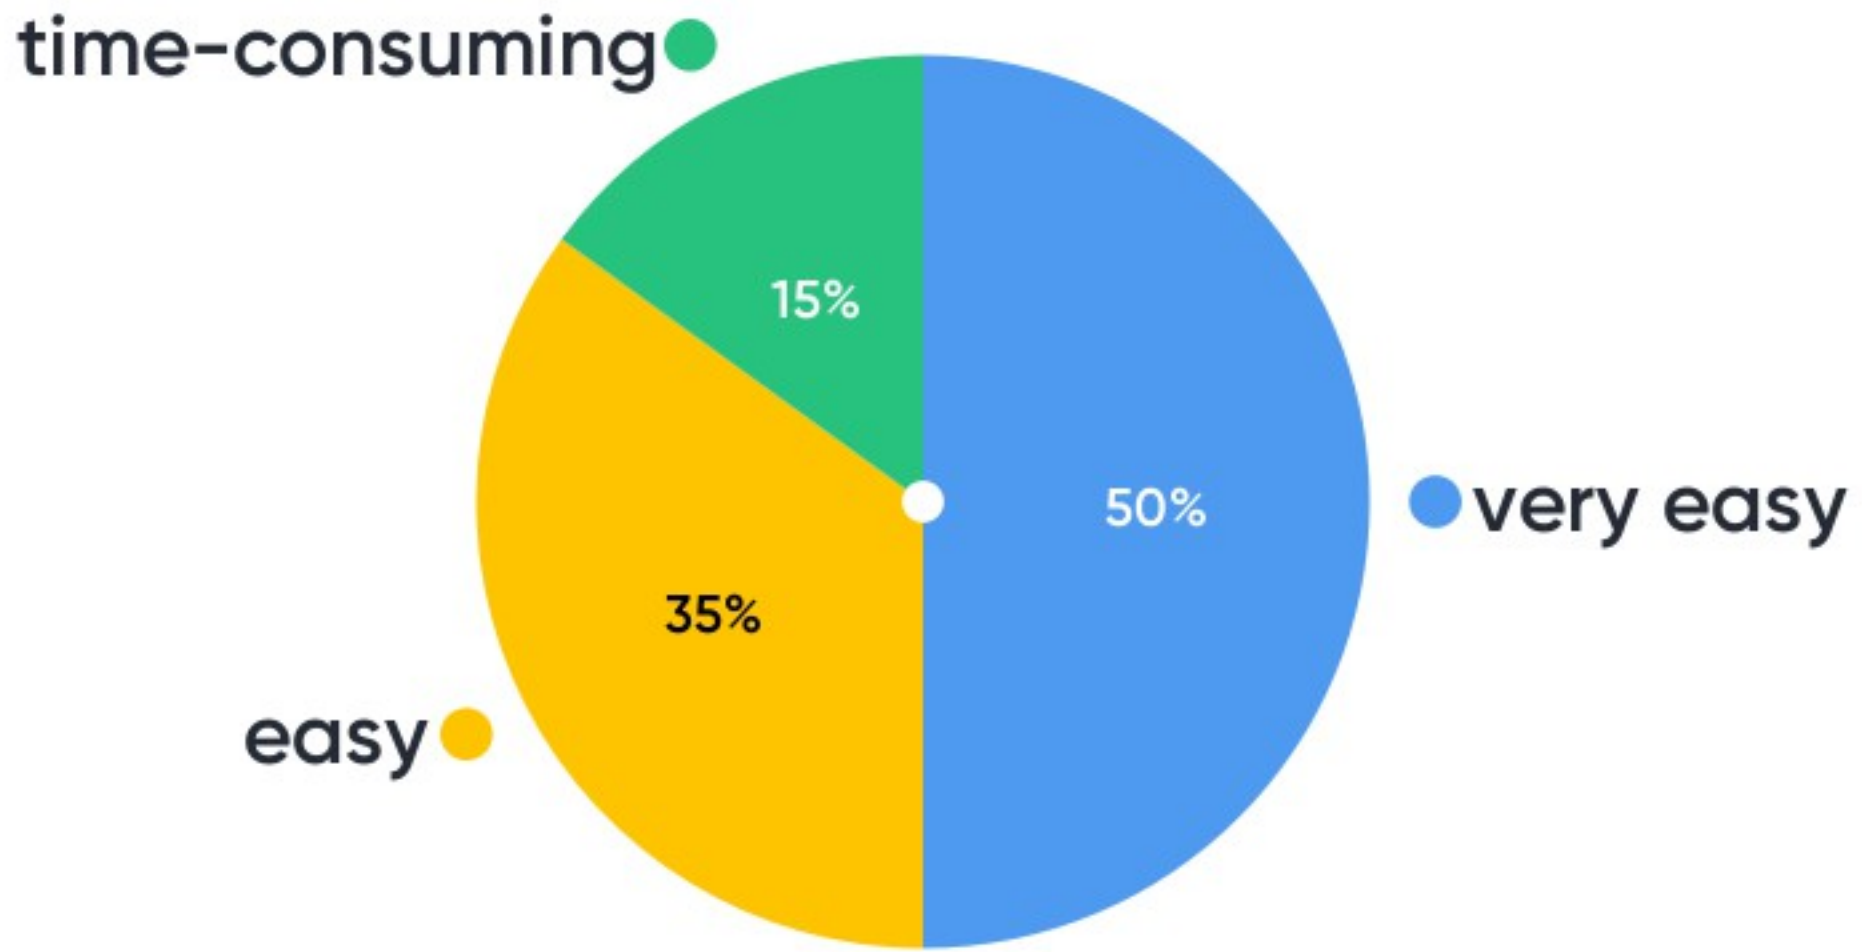

2. How was the image movement?

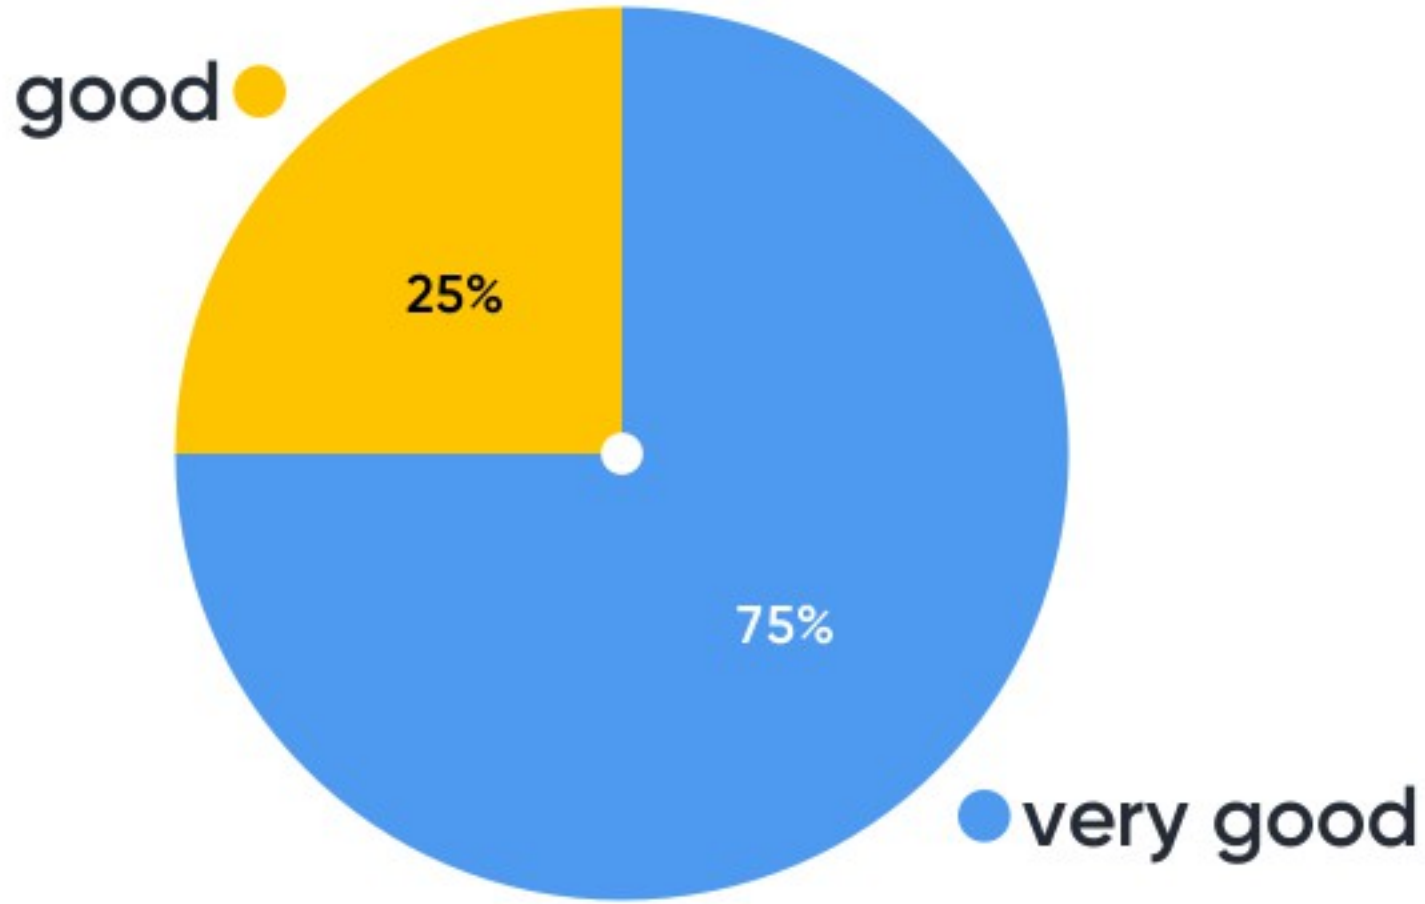

3 . How was the quality of sound?

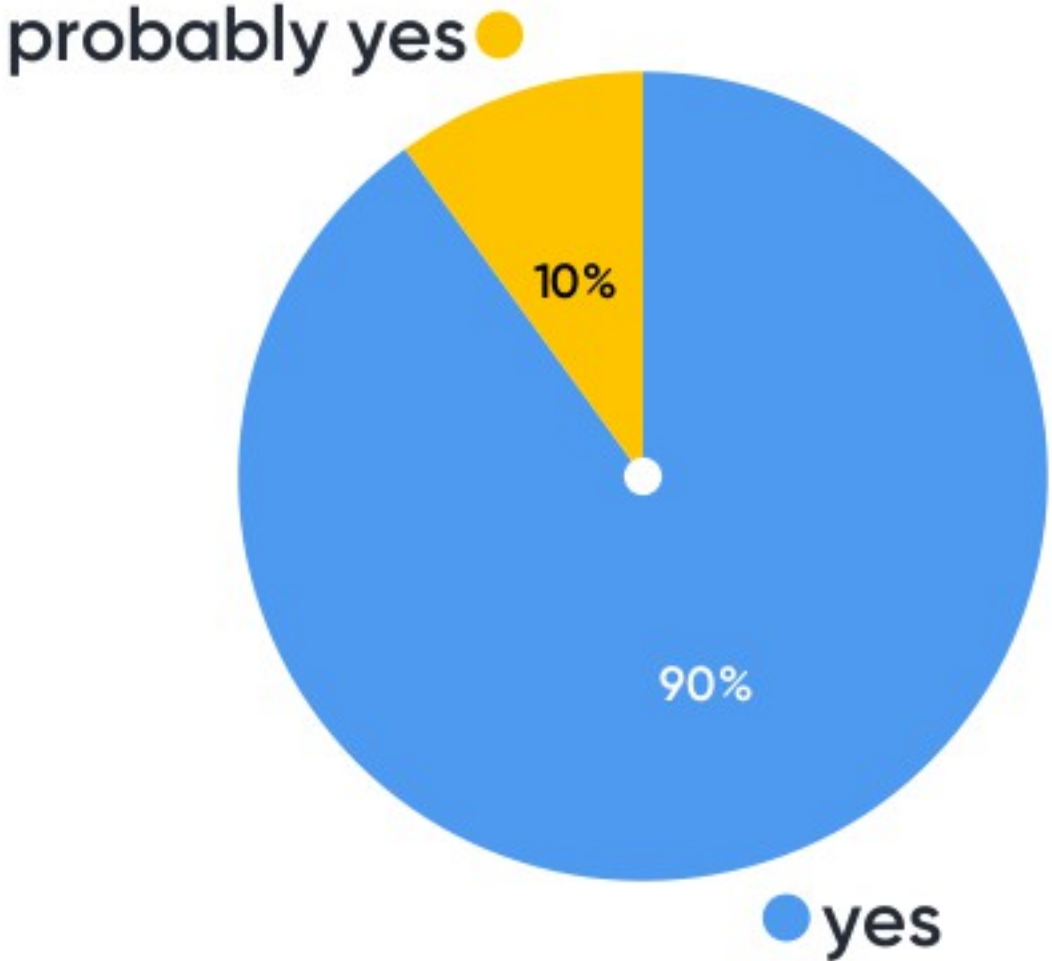

4 . How was the preparations?

5 . How was the program?

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

Very nice and interesting

very interesting presentations.
pity that audio was poor at
main venue.

I was happy because I felt like
I came home after a long time.

If presenter have
demonstration, they must test
before that.

Some technical problem
especially video

Video when demo proximie
application it take time to
prepare from APAN48 Venue

Zoom is good choice. The
session was successful. The
presentations were
interesting, useful.

Thank you for organizing this
wonderful session.

Some audio distrubance -
some times

7. If you found any problems in teleconference, please write any comments you may have.

Maybe organiser need to provide multi-input video mixer with at least 8 channel I/O for APAN teleconferencing

i think the venue sound for 1st presenter sound like choppy sound but still can be understood.. but it is good to have a smooth and clear sound

Make sure of the quality of wired sound to mixer, be more good

8 . Which is your station?
