

APAN48 - Rural Healthcare session

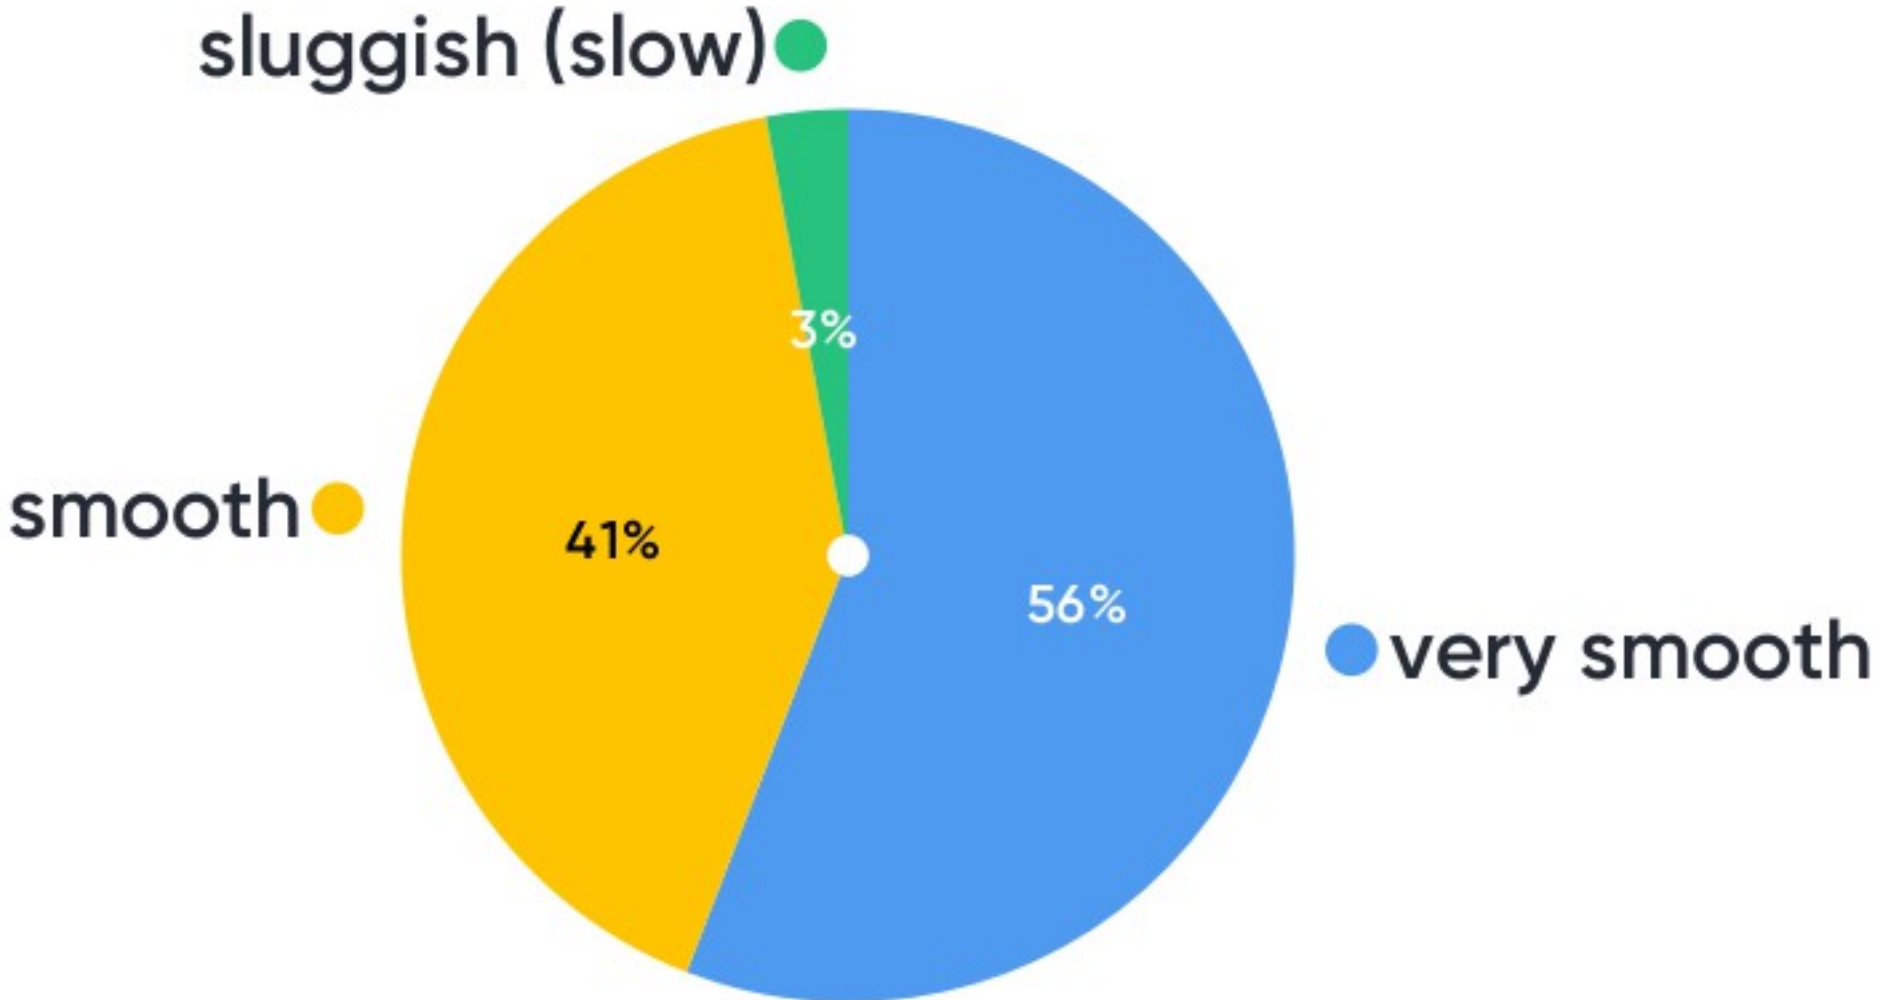

July 22, 2019

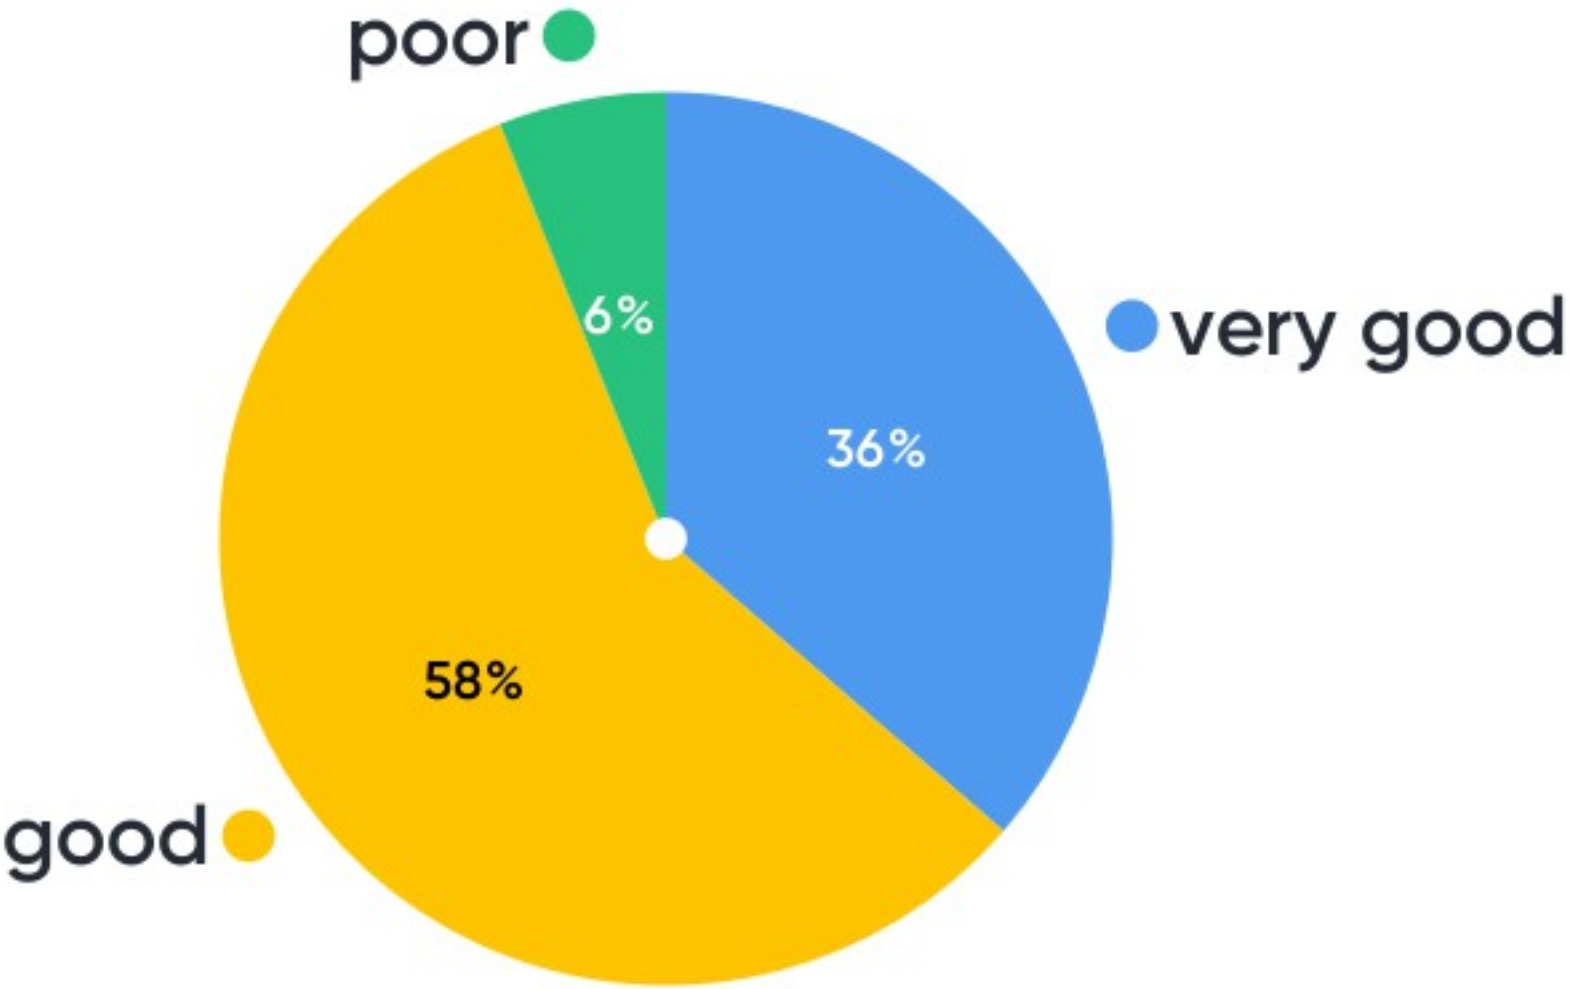

1. How was the image sharpness?

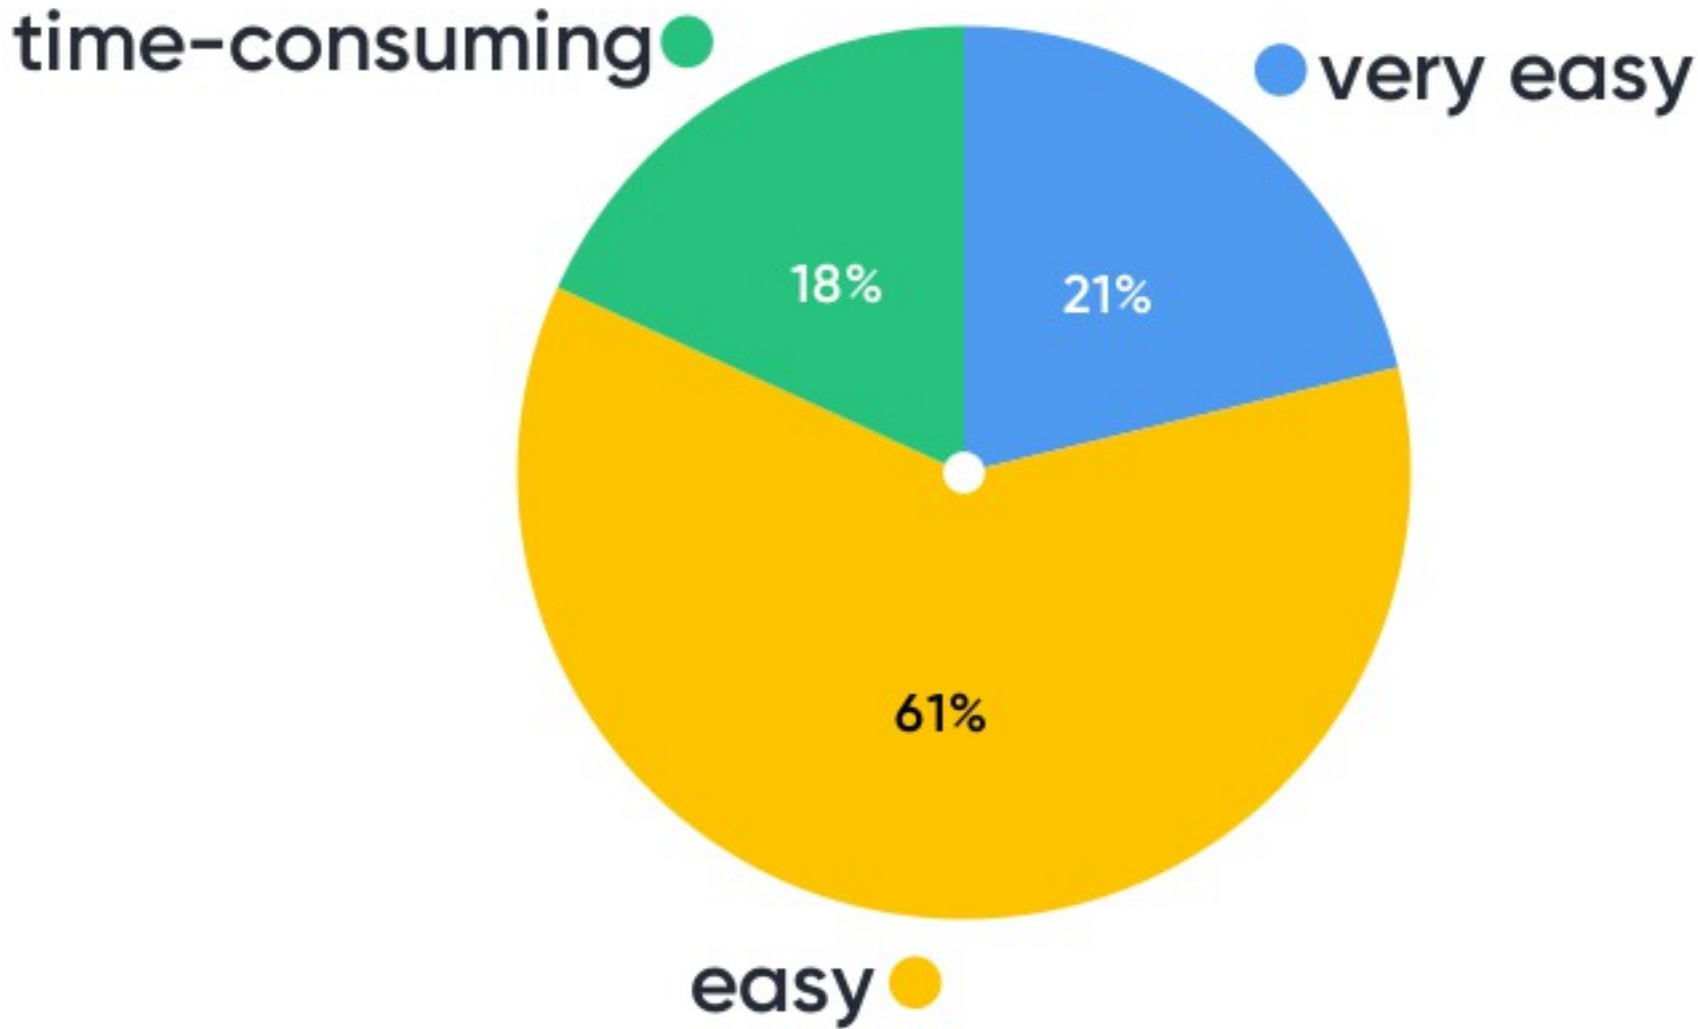

2. How was the image movement?

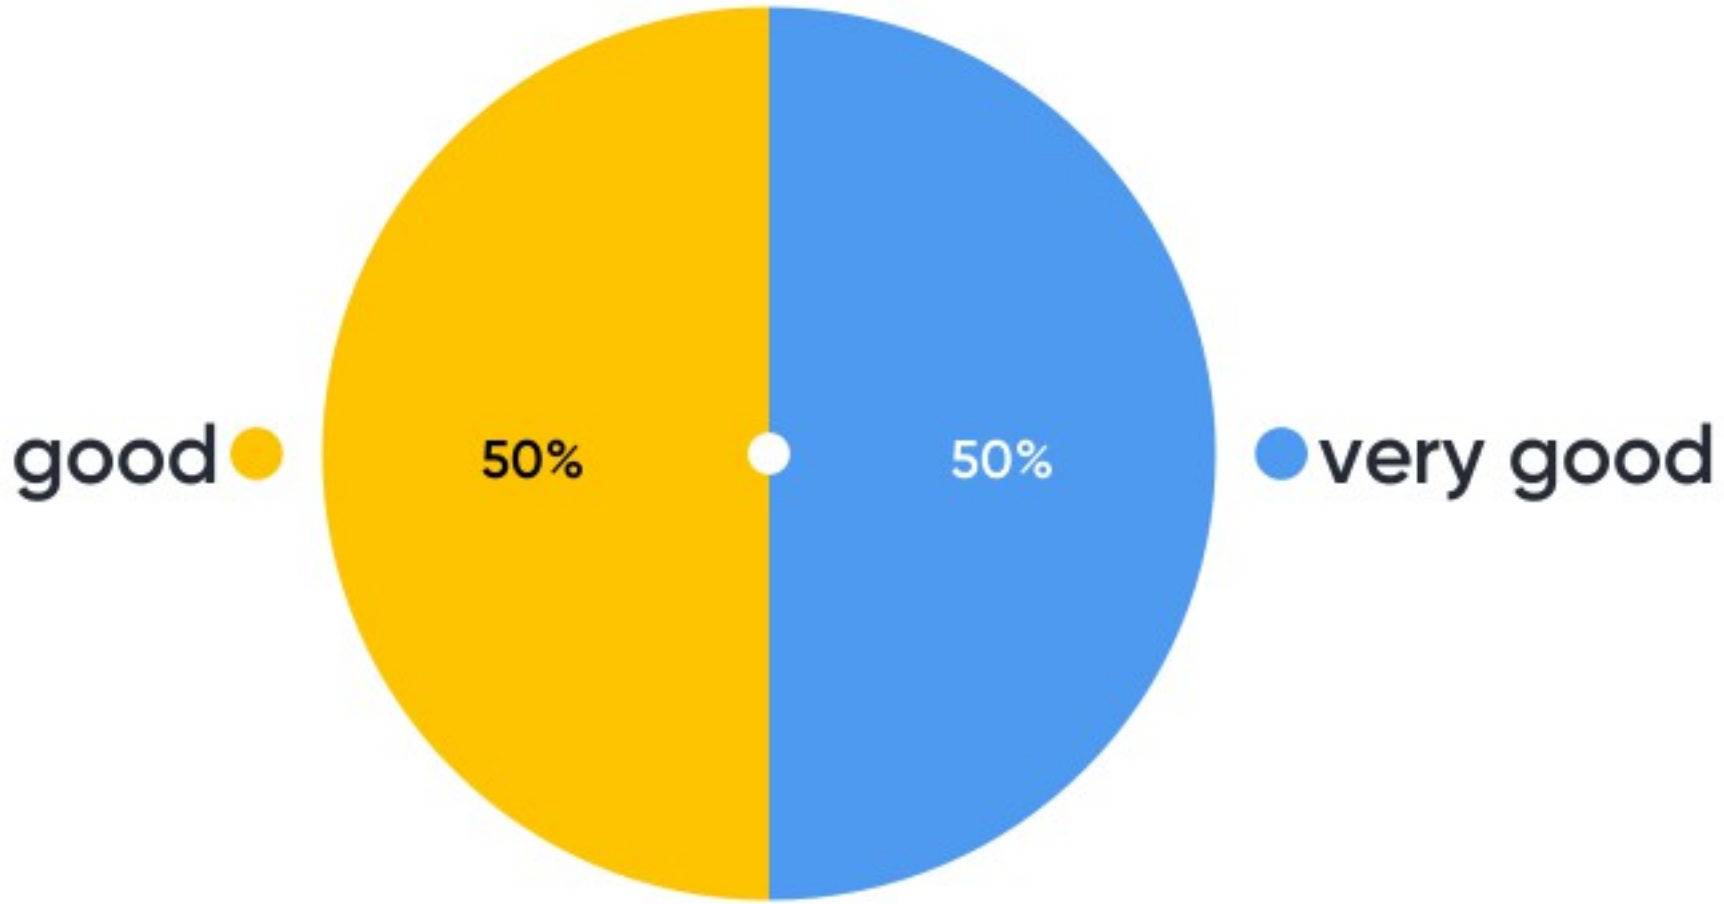

3. How was the quality of sound?

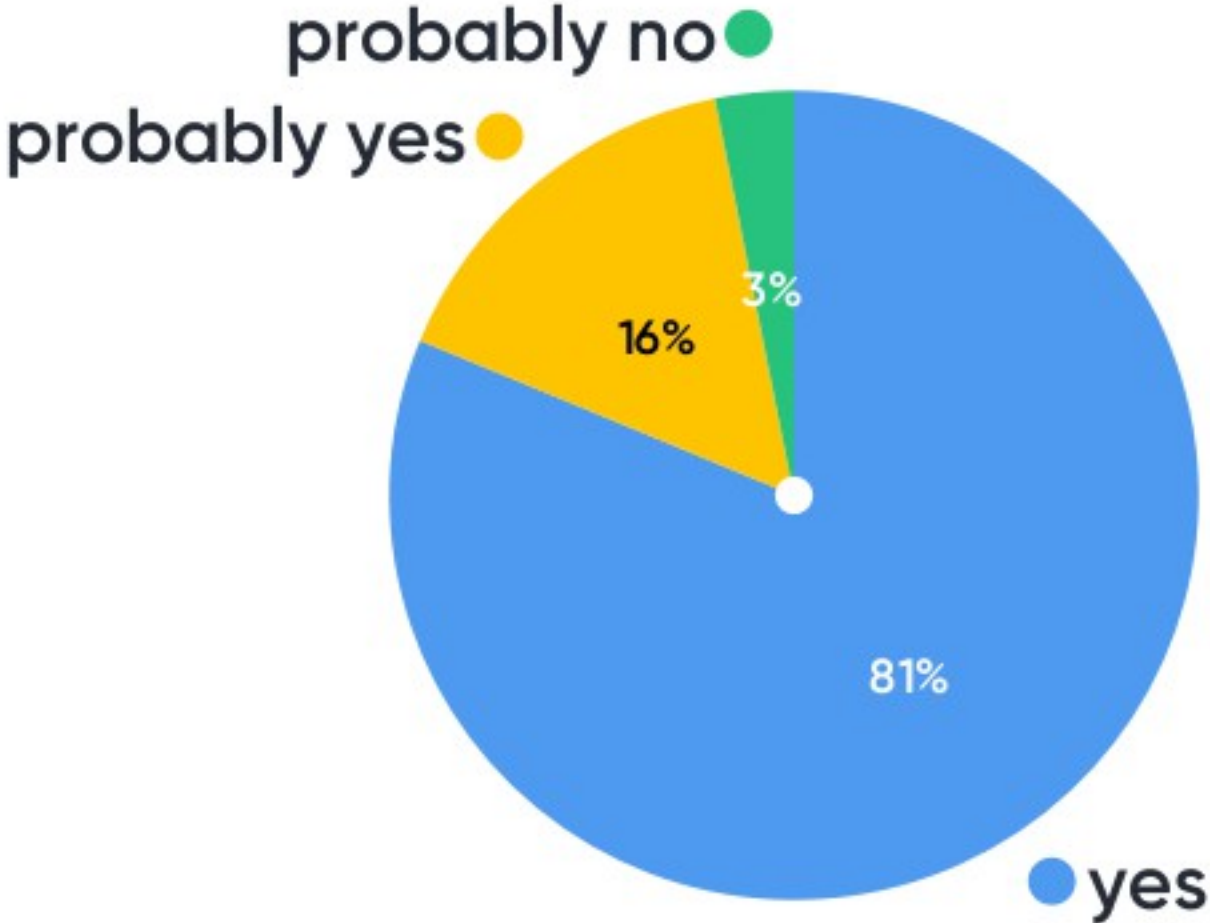

4 . How was the preparations?

5 . How was the program?

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

The time was not managed well.

APAN Venue audio quality is good. May have problem with audio connector mini jack from the Audio mixer (loose connector)

sound handling should be improve.. so much disturbance from center which did not mute their microphone

Everything good

Some presenters looks hard to share their contents

Everything was smooth.

Little bit noise from new connecting sites. They forget to mute their microphone but overall it was great session

Had issue with VidyoDesktop setup on Linux

I think the topic must be given to speakers based on the expected outcome of the teleconference

7. If you found any problems in teleconference, please write any comments you may have.

Use 4k kamera for better video with low light control

Nothing special problem but found some technical errors: like presenter started to present without sharing the screen. etc

I didnt find any problems. I was so happy to join the Conference for the first. I would like to join more conferences in future. Thank You.

NA

Mic quality is not really good

the technical support everytjing goung smoothly

We observed sound problem at B.P. Koirala Institute of Health Sciences Ghopa, Dharan, Nepal. They were using wireless connection it might the cause of audio problem.

NA

The presenters were not familiar with the teleconferencing software, few struggled projecting PowerPoint.

7. If you found any problems in teleconference, please write any comments you may have.

Overall Teleconference was good. Interaction between Engineers wasn't smooth even there wasn't any response of the queries. Despite all the things goes very well. Thank You.

More such conferences or talk programmes are required by eloquent authorities in their area of interest. More involvement so that it can reach to wider audiences. Just more needed.

8. Which is your station?
