

APAN48 -Internal Medicine Session

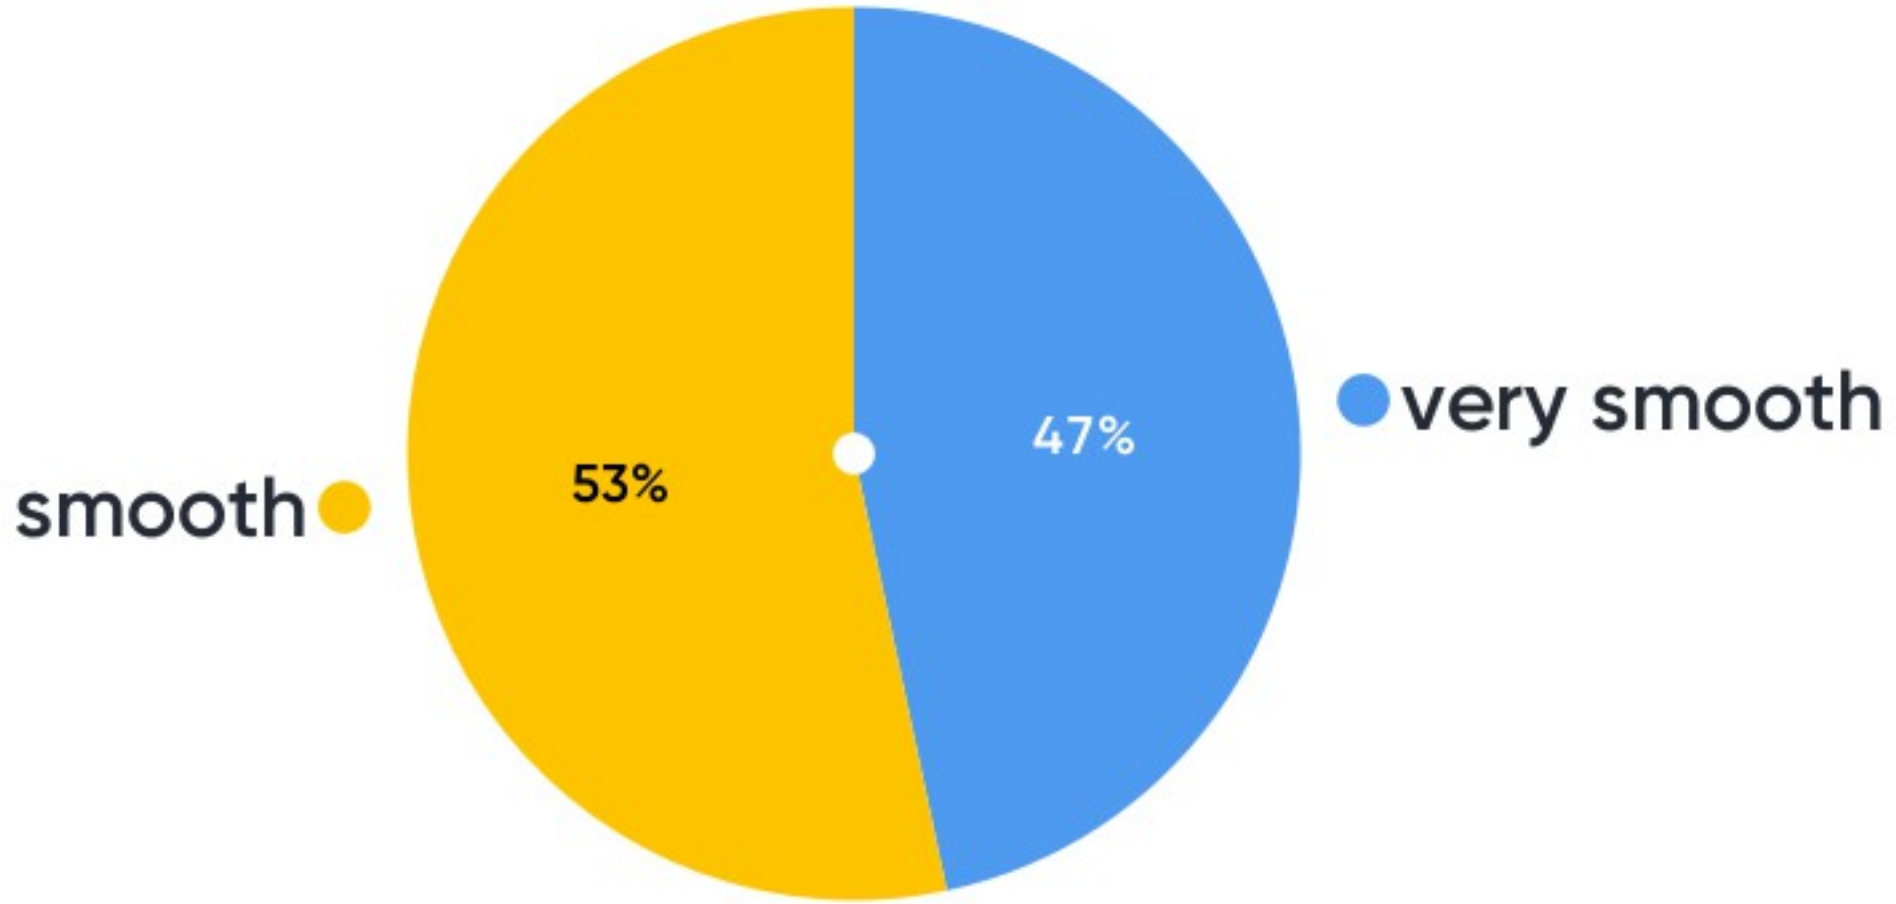

July 24, 2019

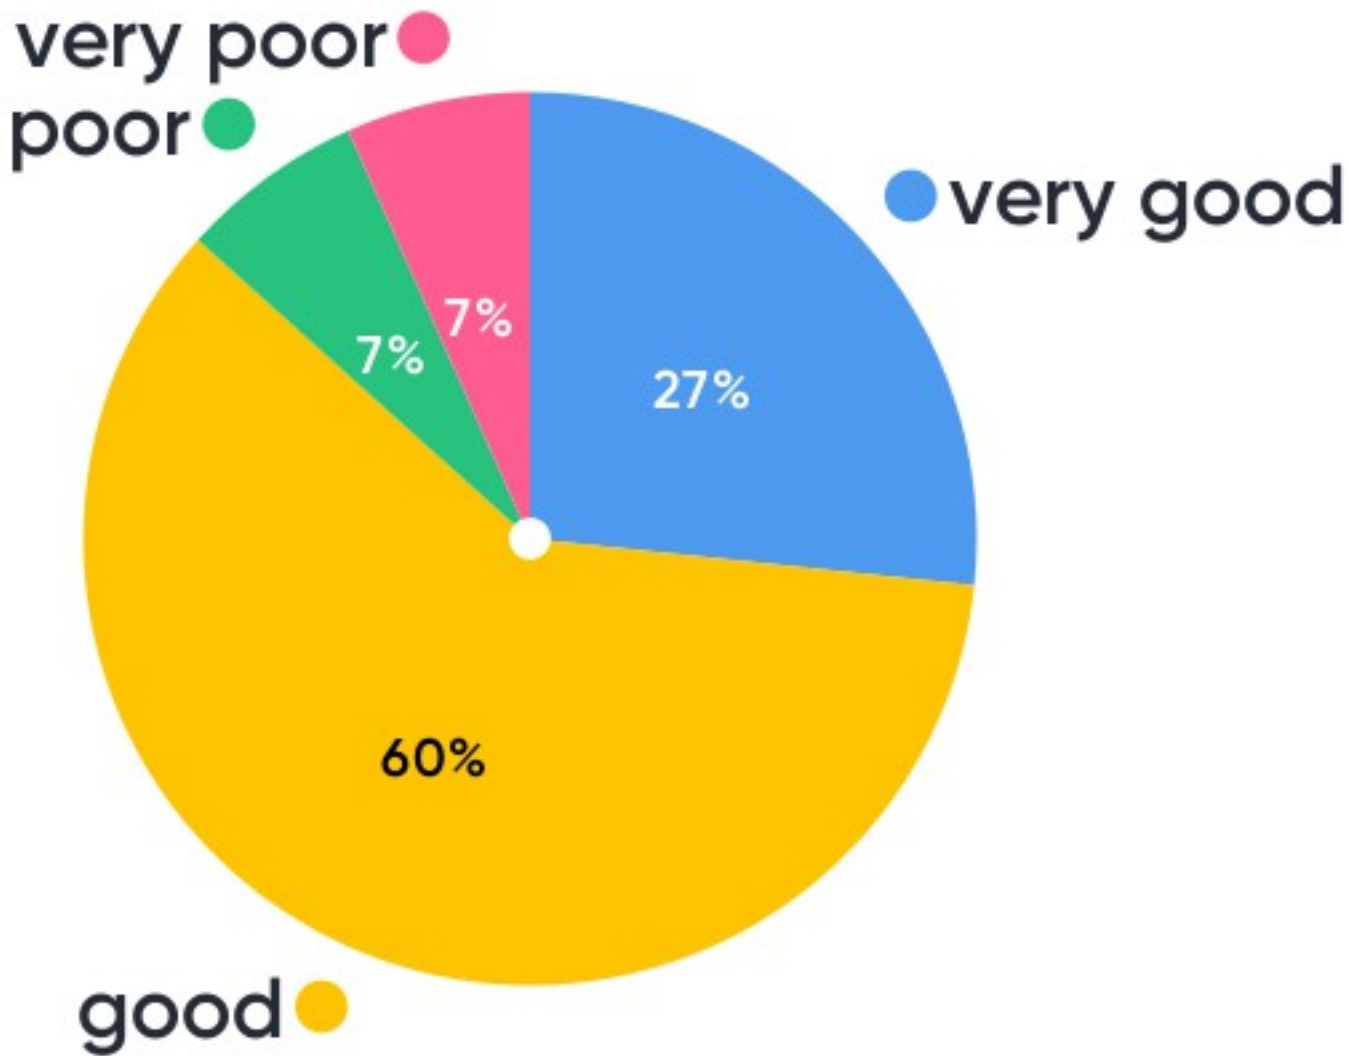

1. How was the image sharpness?

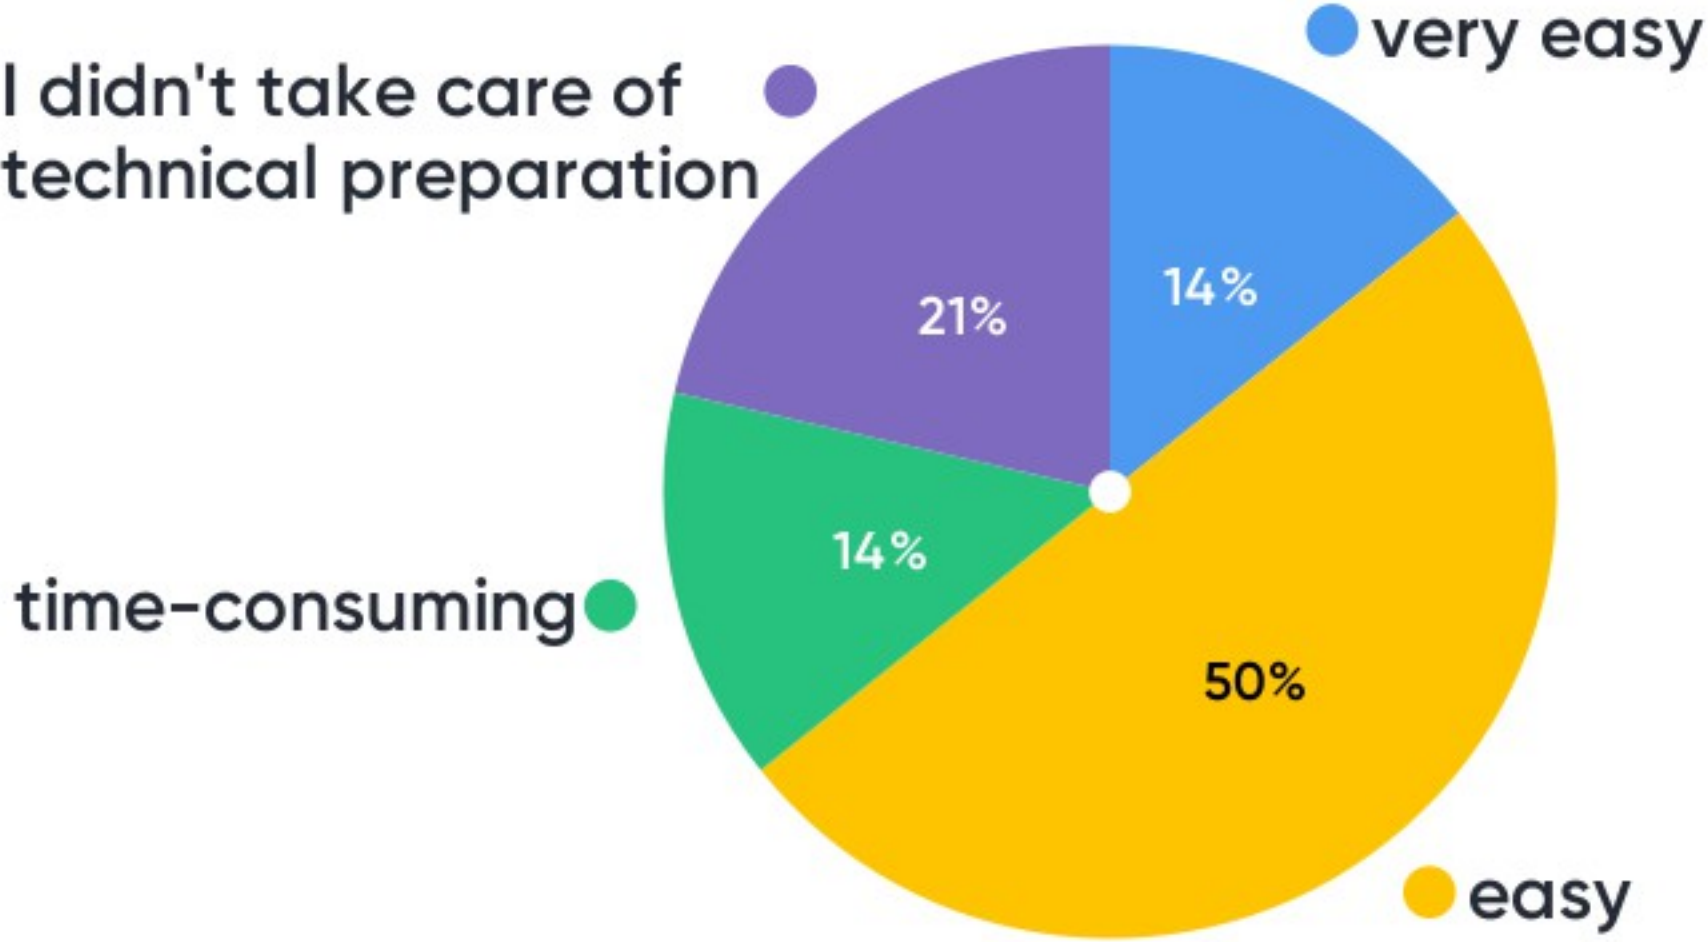

2. How was the image movement?

3. How was the quality of sound?

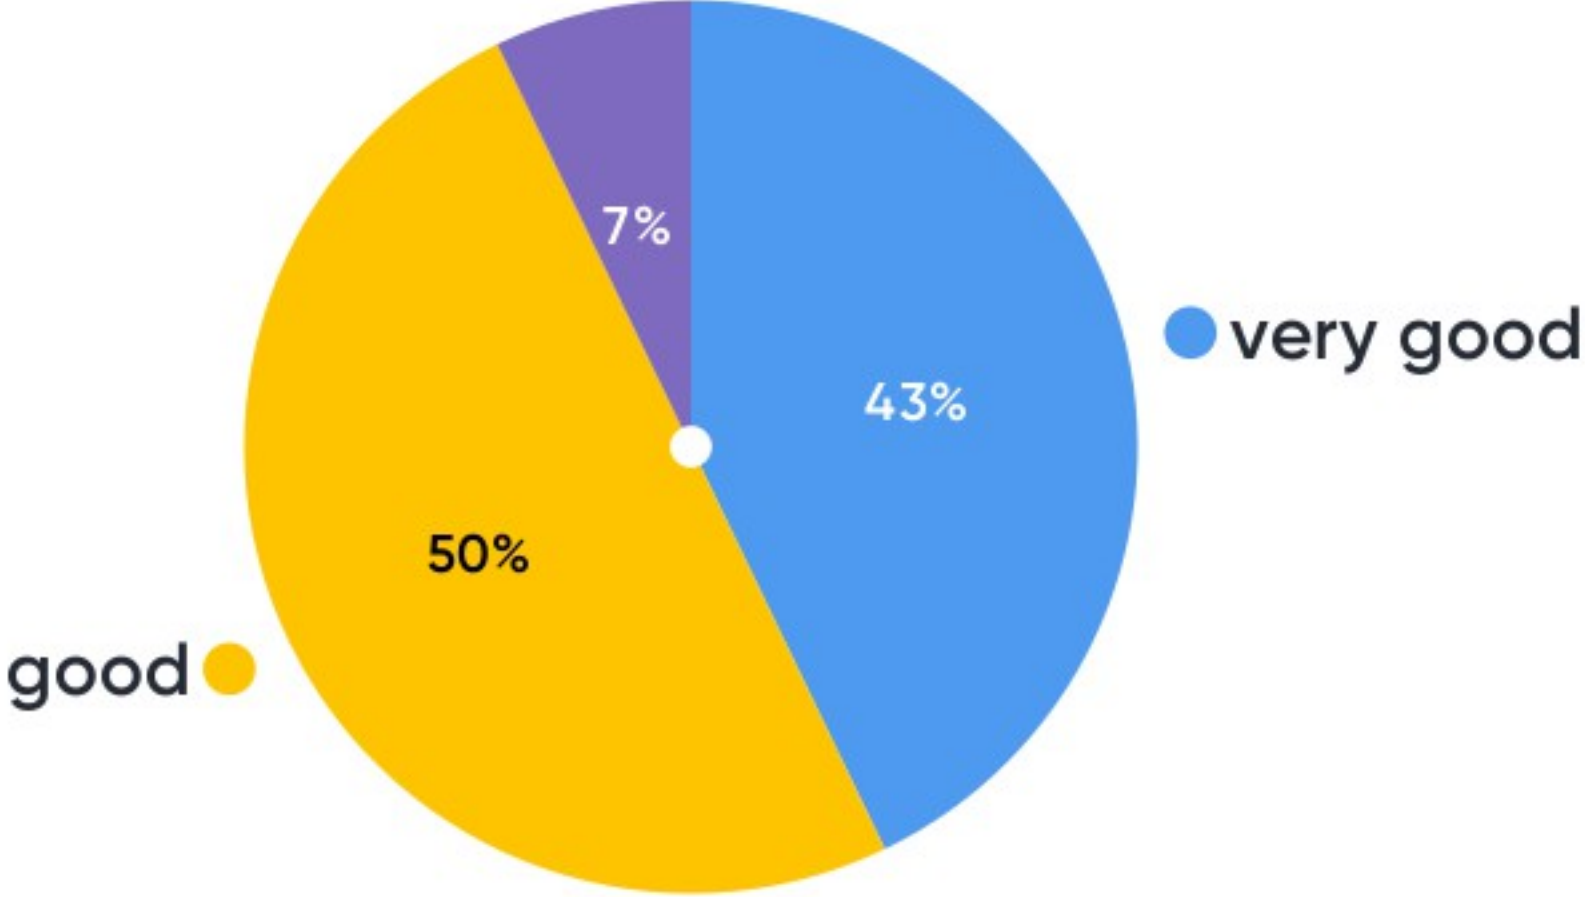

4 . How was the preparations?

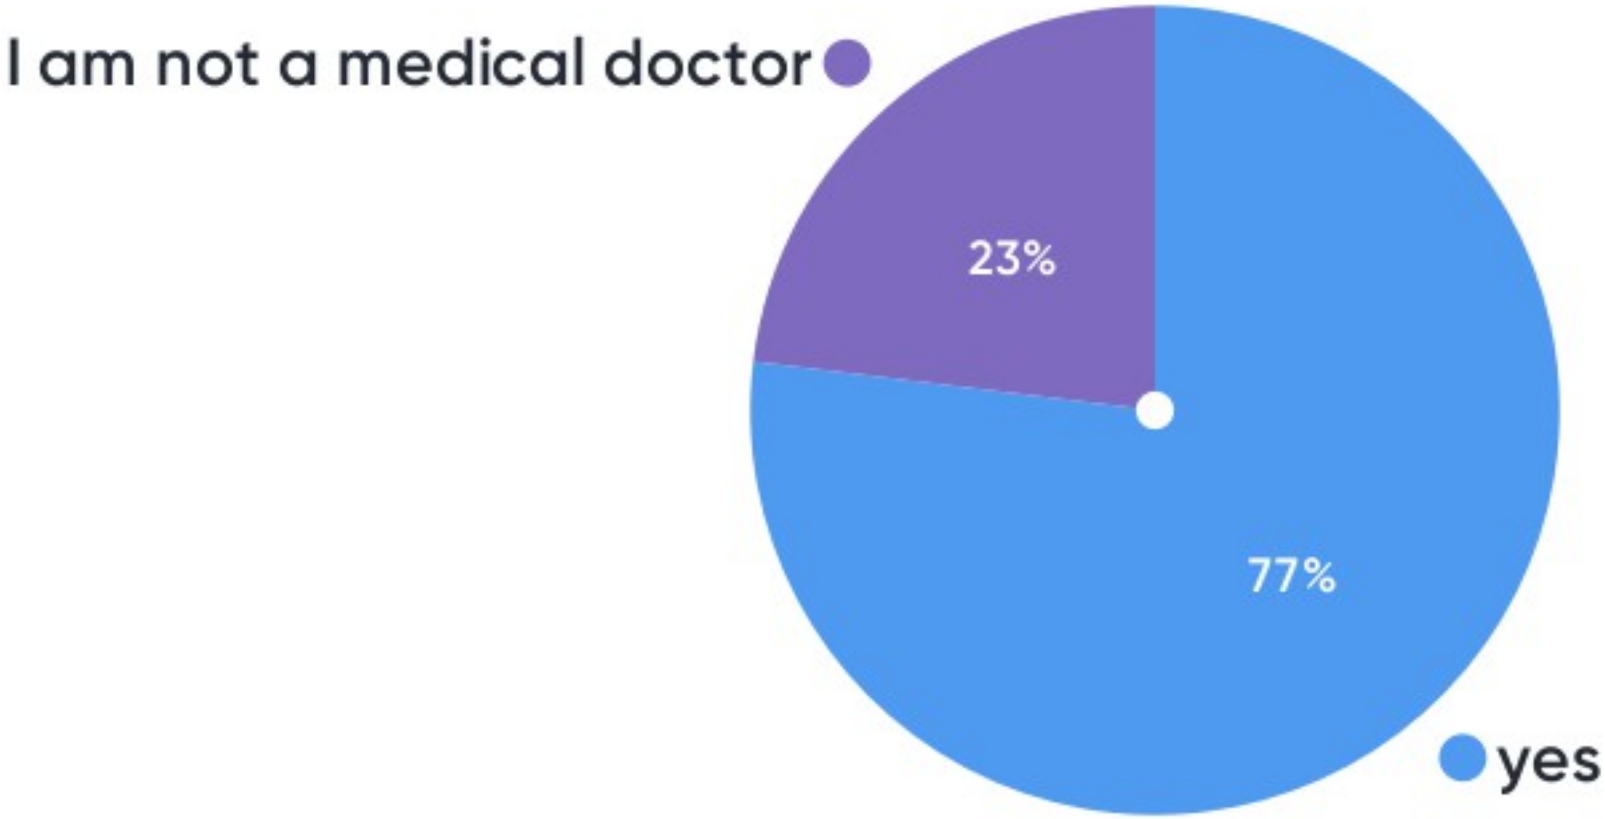

5. How was the program?

I am not a medical doctor ●

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

i think sound could be better to be improve and chief engineer shall detect and mute the site which cause disturbance sound

Sound quality was very good for few Medical Colleges like MMC, DMC, RMC but not at all good for RpMC Norms need to be fixed, like muting speakers while not speaking, distance of mouth-piece from mouth, Role of host in allowing to speak etc.

Some sites failed to control noise

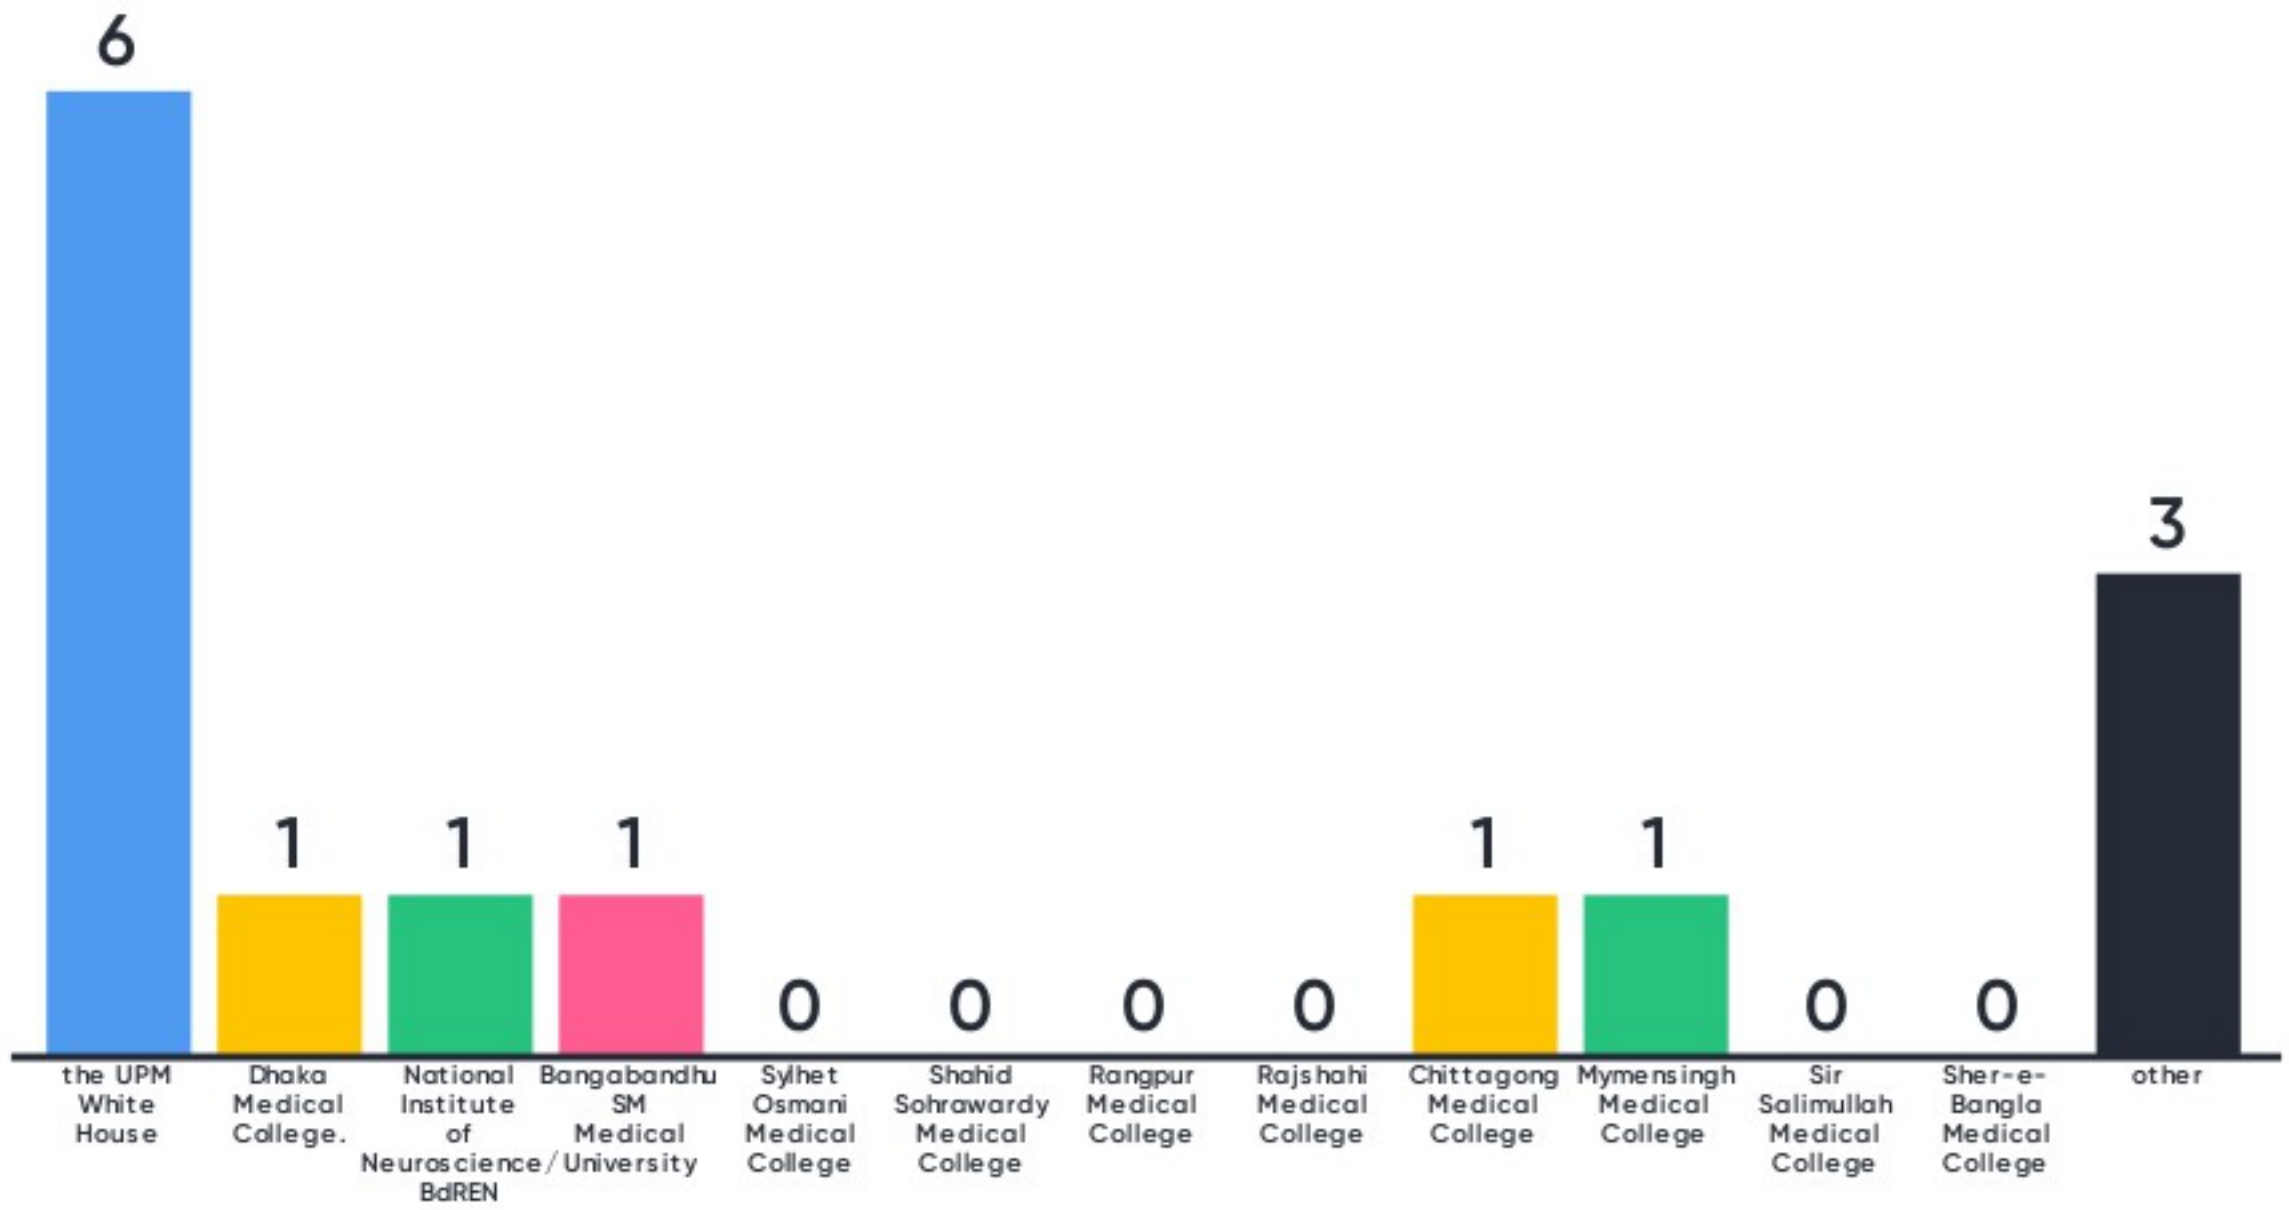

It nice session

The discussion heated up so it was nice but each site should only turn on the microphone when they speak. It was confusing who was talking and a lot of discussion were disturbed.

No problem

8. Which is your station?

9 . Which is your occupation?
