

APAN47 - The 19th Indonesian Neuroimmunology Case Teleconference

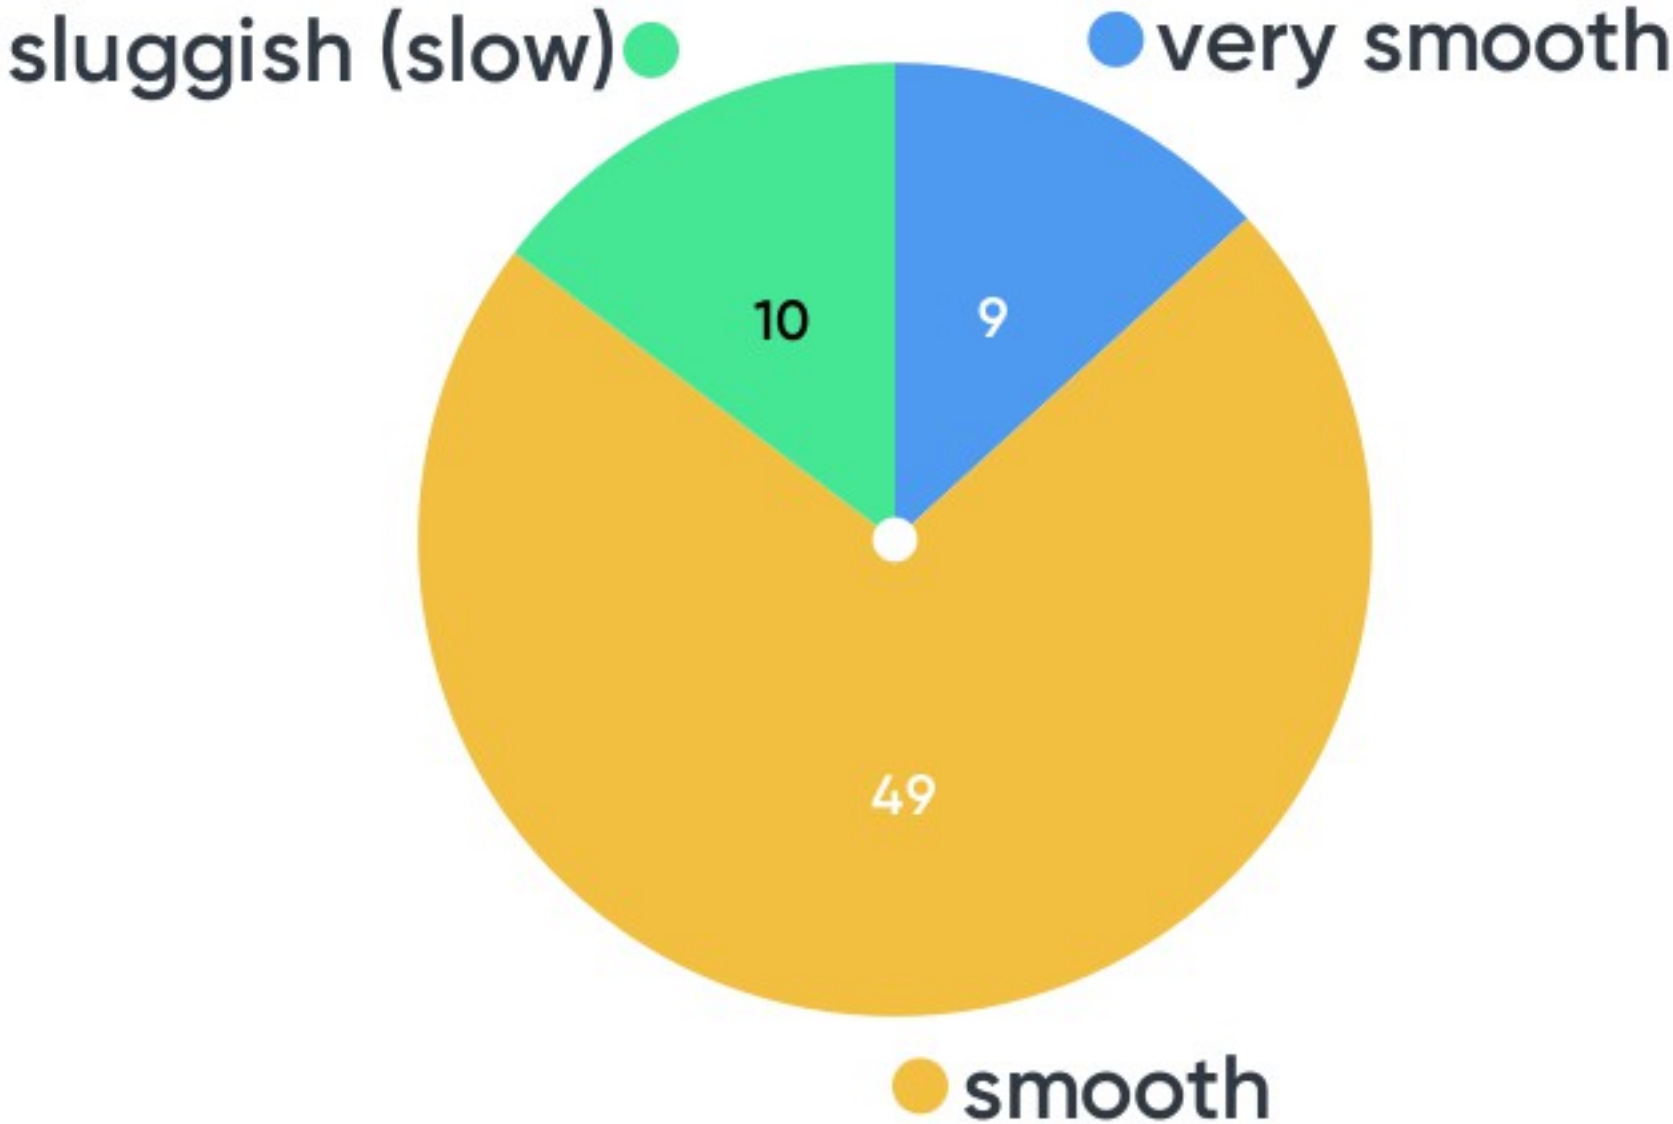

February 19, 2019

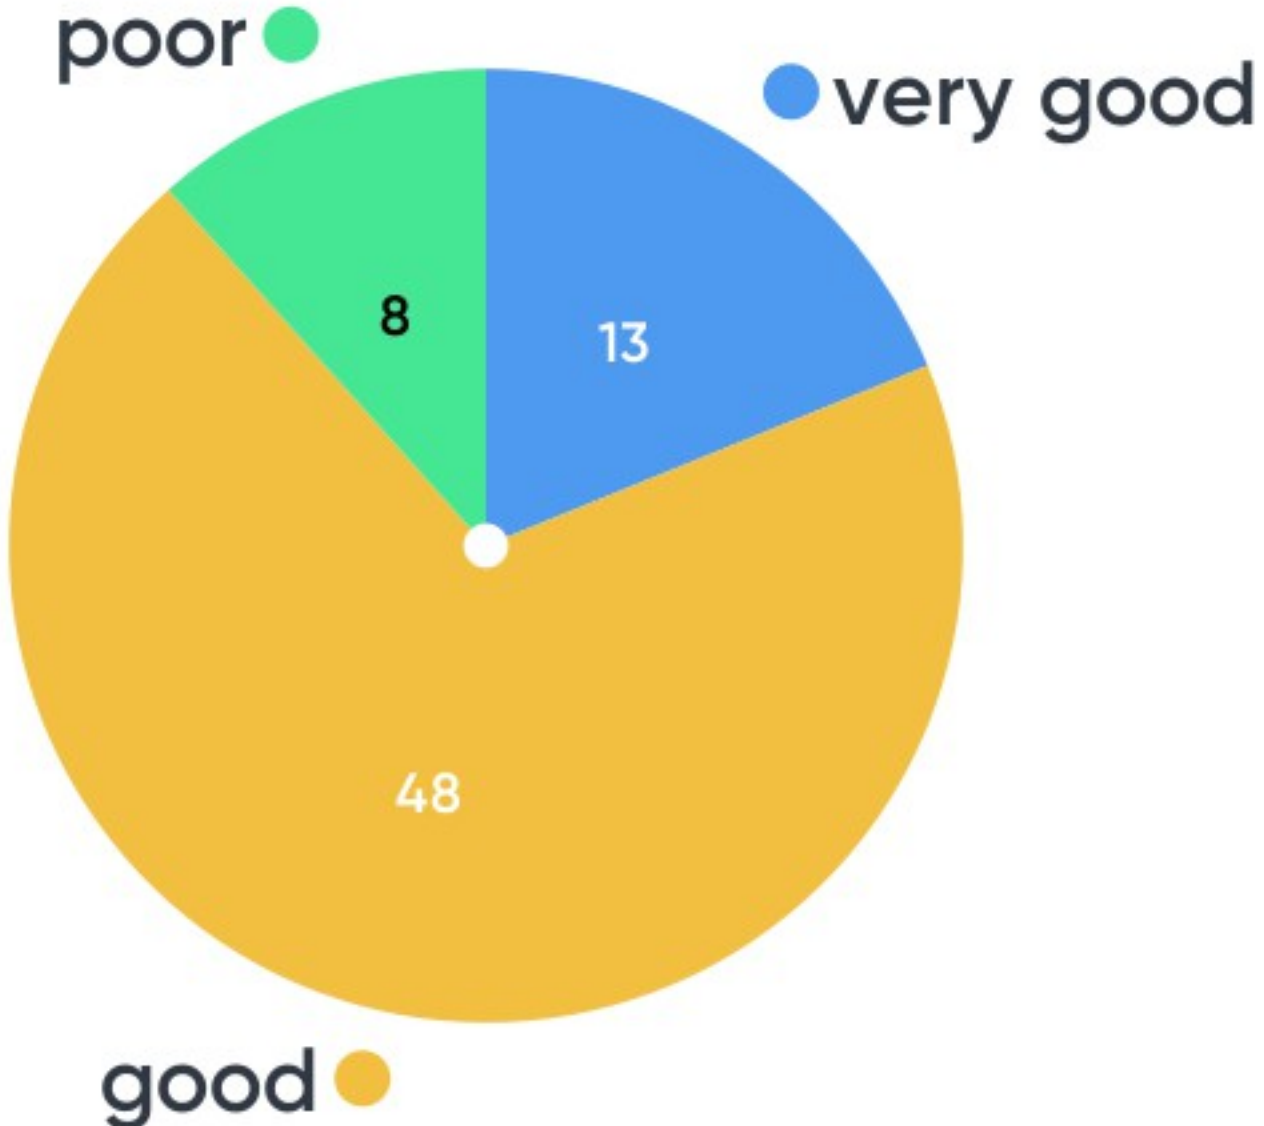

1. How was the image sharpness?

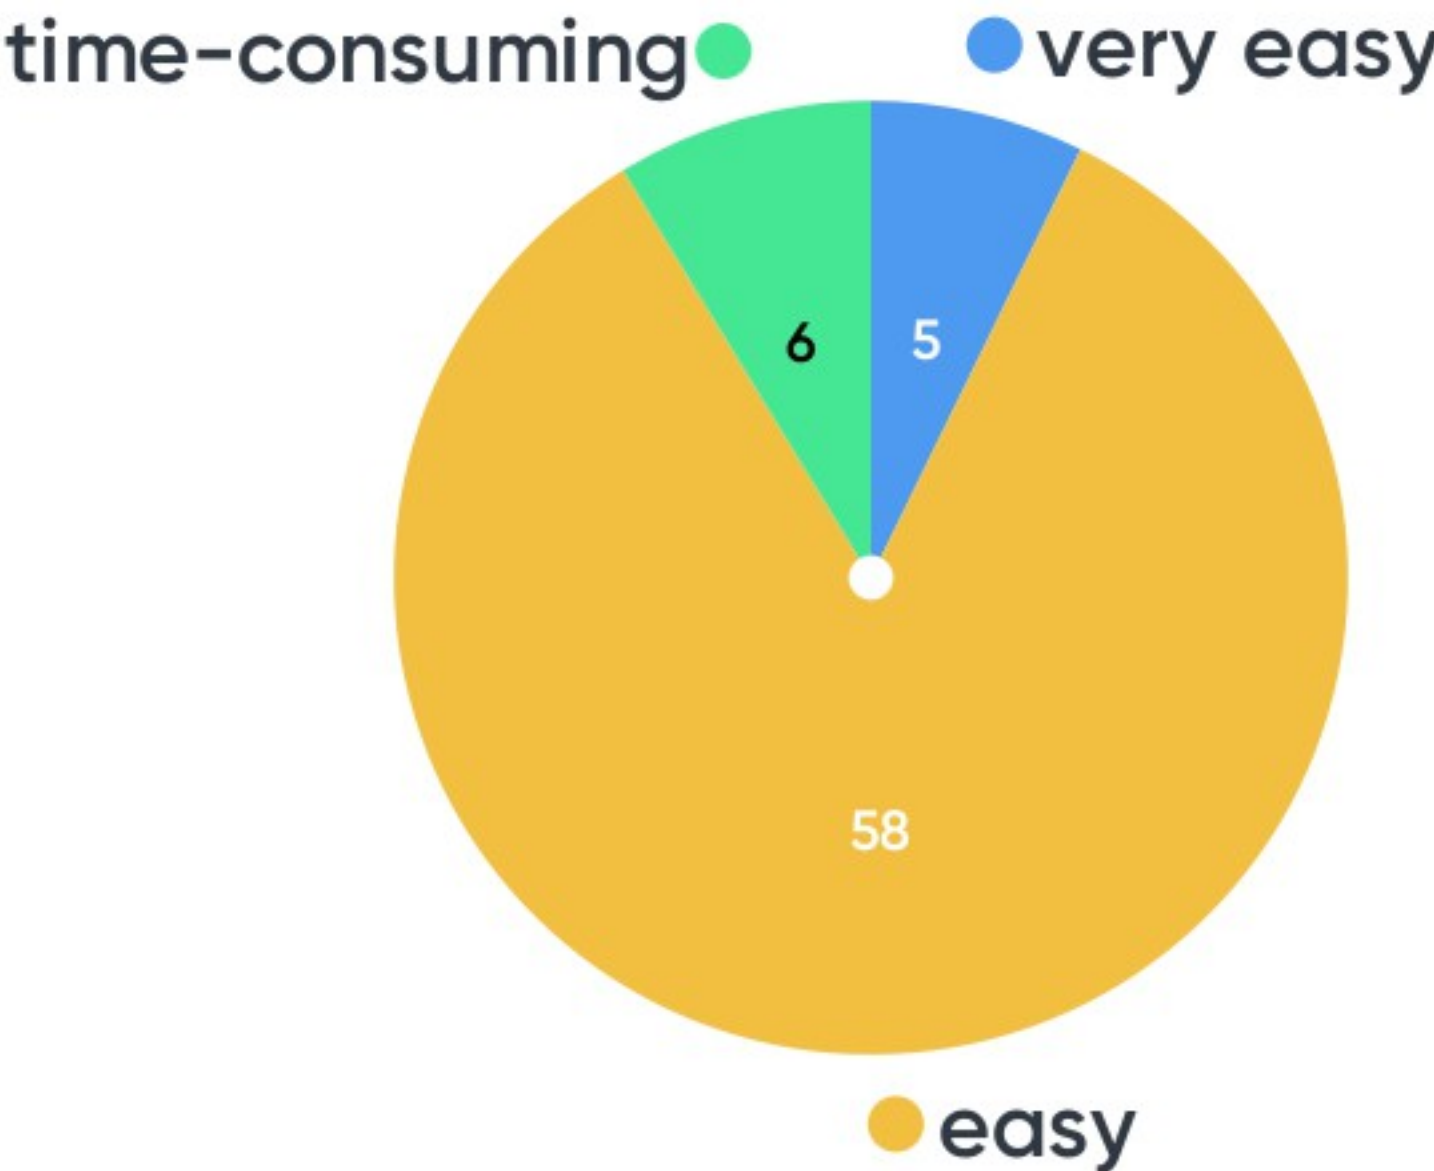

2. How was the image movement?

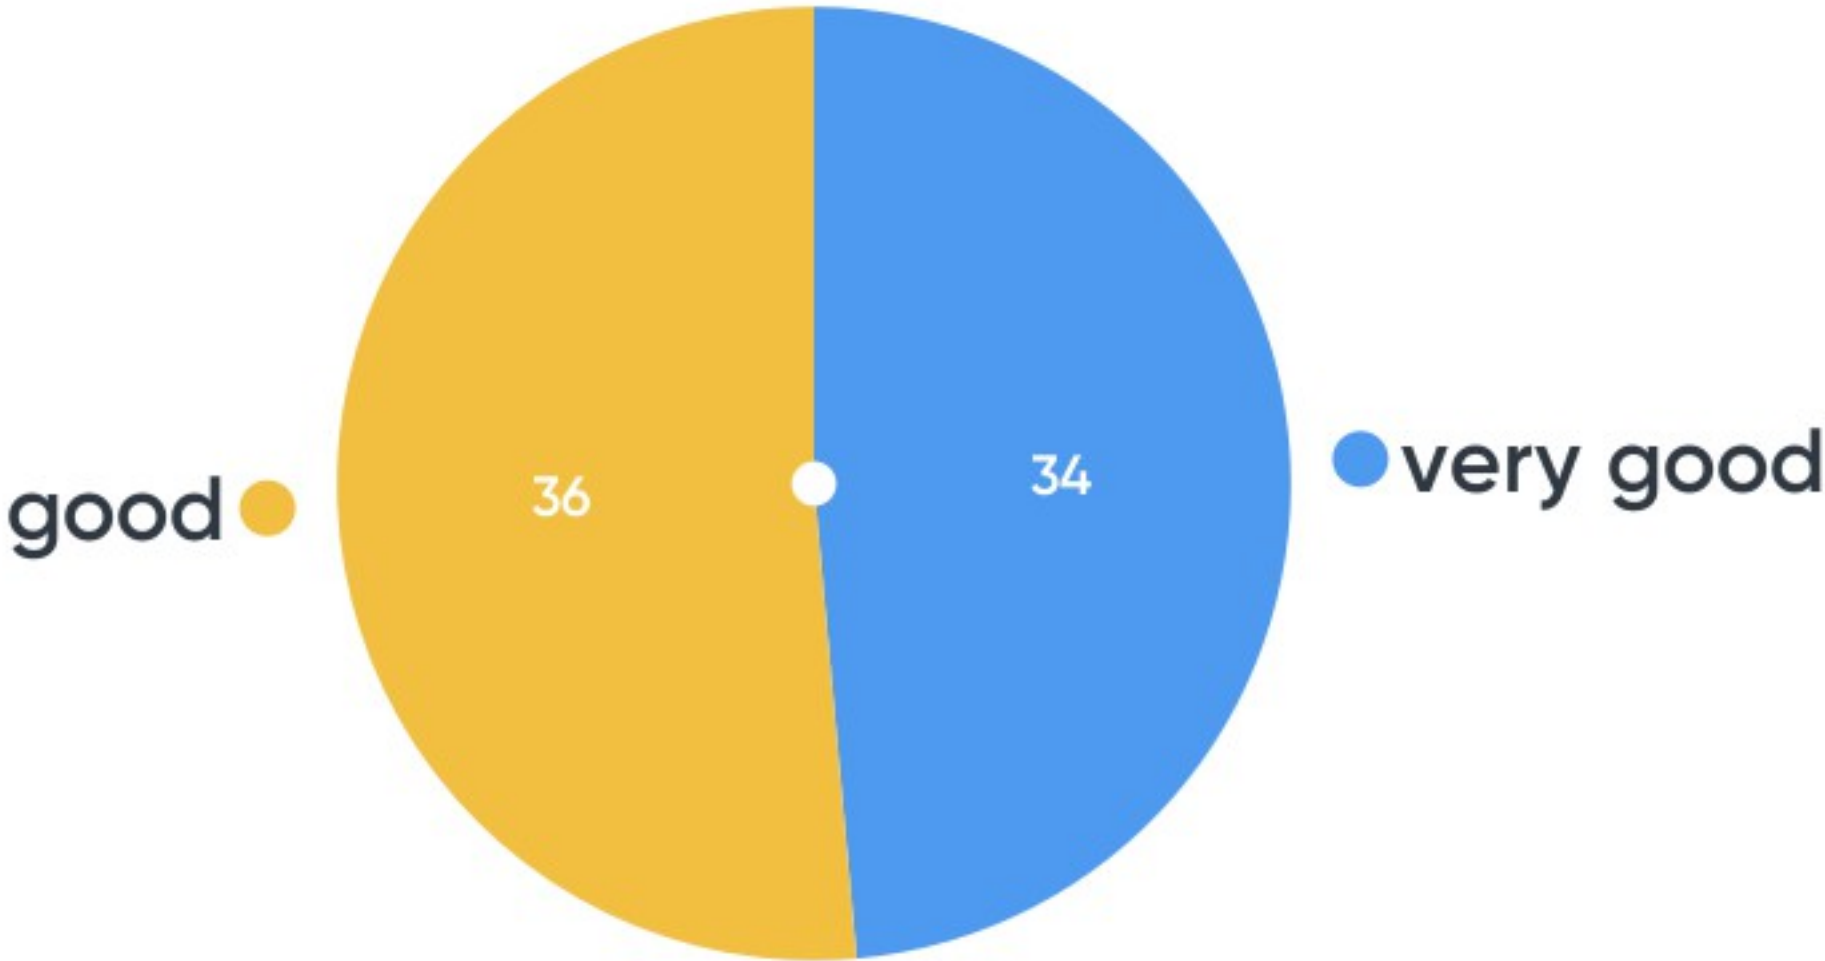

3. How was the quality of sound?

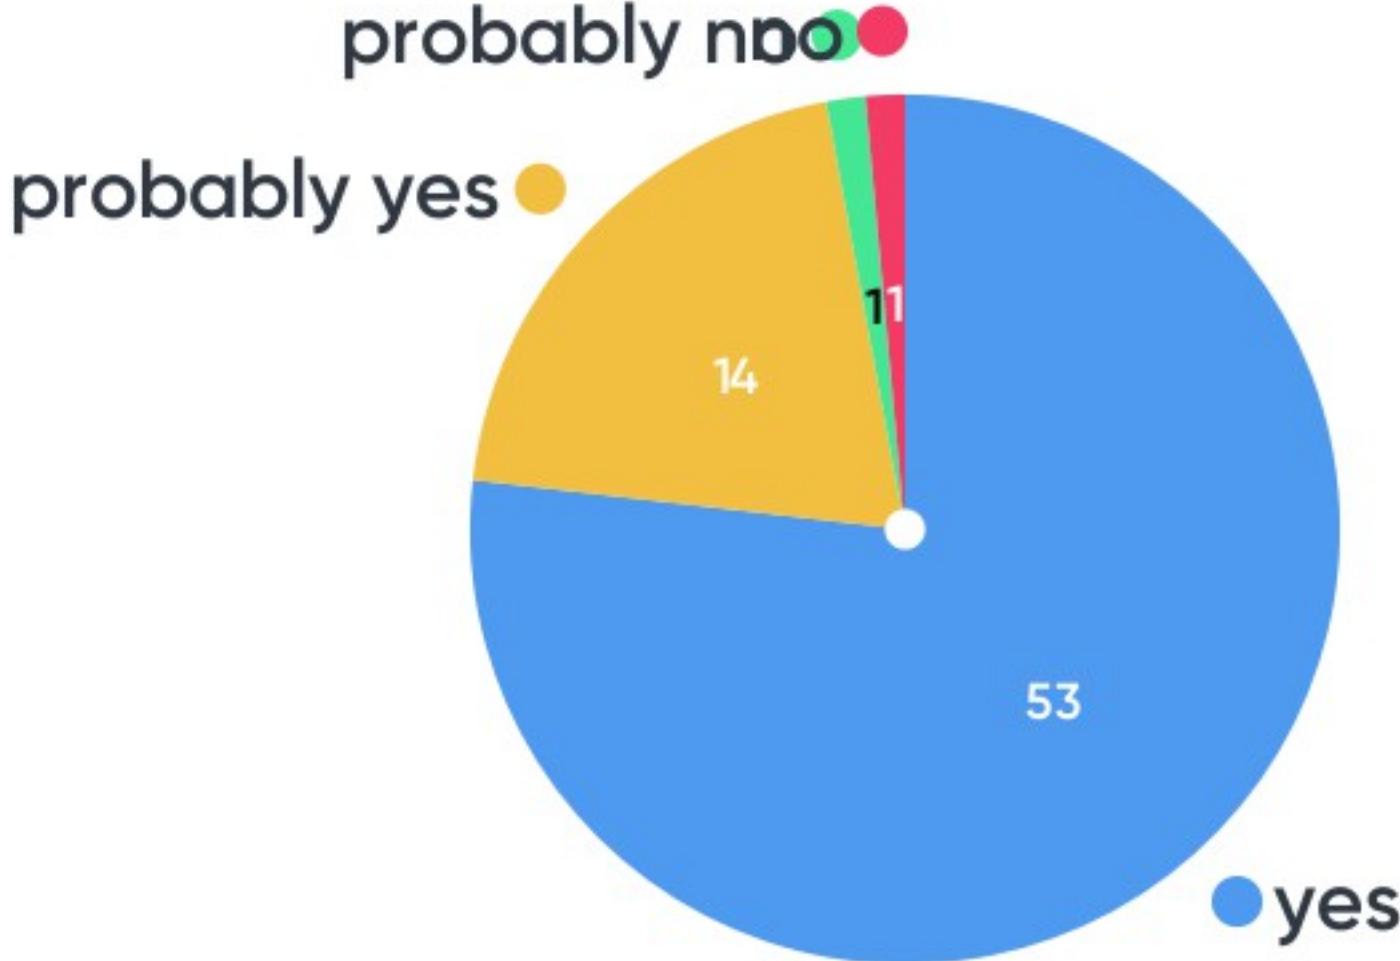

4. How was the preparations?

5. How was the program?

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

Some lag during session

Overall quality is good, but theres always room to improve

No

great disscussion from everyone

Other teleconference with different thema

Some engineers commented ppt from UI is blur

Image quality from University if Indonesia was very hazy

Participants were disconnected some time..

the connection isnt stable

7. If you found any problems in teleconference, please write any comments you may have.

I think good teleconference

No problem

Sometimes we had some noise background or trembling sound..

some echo from other sites, but manage immediately by the engineers.

Sometimes lag connections from other and unstable internet connections in indonesia Nice cases, required more reliable research for the treatment

These two cases are attracting many questions. Unfortunately the time is limited for today. Perhaps we could do a similar topic (relating HIV and neuroimmunological disorders) next time with more duration.

The sound from overseas quite poor.

Images in vidyo not to clear than zoom

Maybe the only problem that we experienced is the low bandwidth due to technical issues.. Other factor, which is minor, is the differenn sound quality which depends on the mics used on each institute..

7. If you found any problems in teleconference, please write any comments you may have.

nice teleconference

Sometimes disconnected.

no comments

No problem

No problem..very great session!

Great event

No Problem

Good

Sometimes disconnected

7. If you found any problems in teleconference, please write any comments you may have.

It was a great program. It would have been great if we could avoid sound/image problems but maybe this is "live"!

Connection problems

N A

8. Which is your station?
