

APAN47 - Combined ECE (21st) and AIG Endoscopy Session

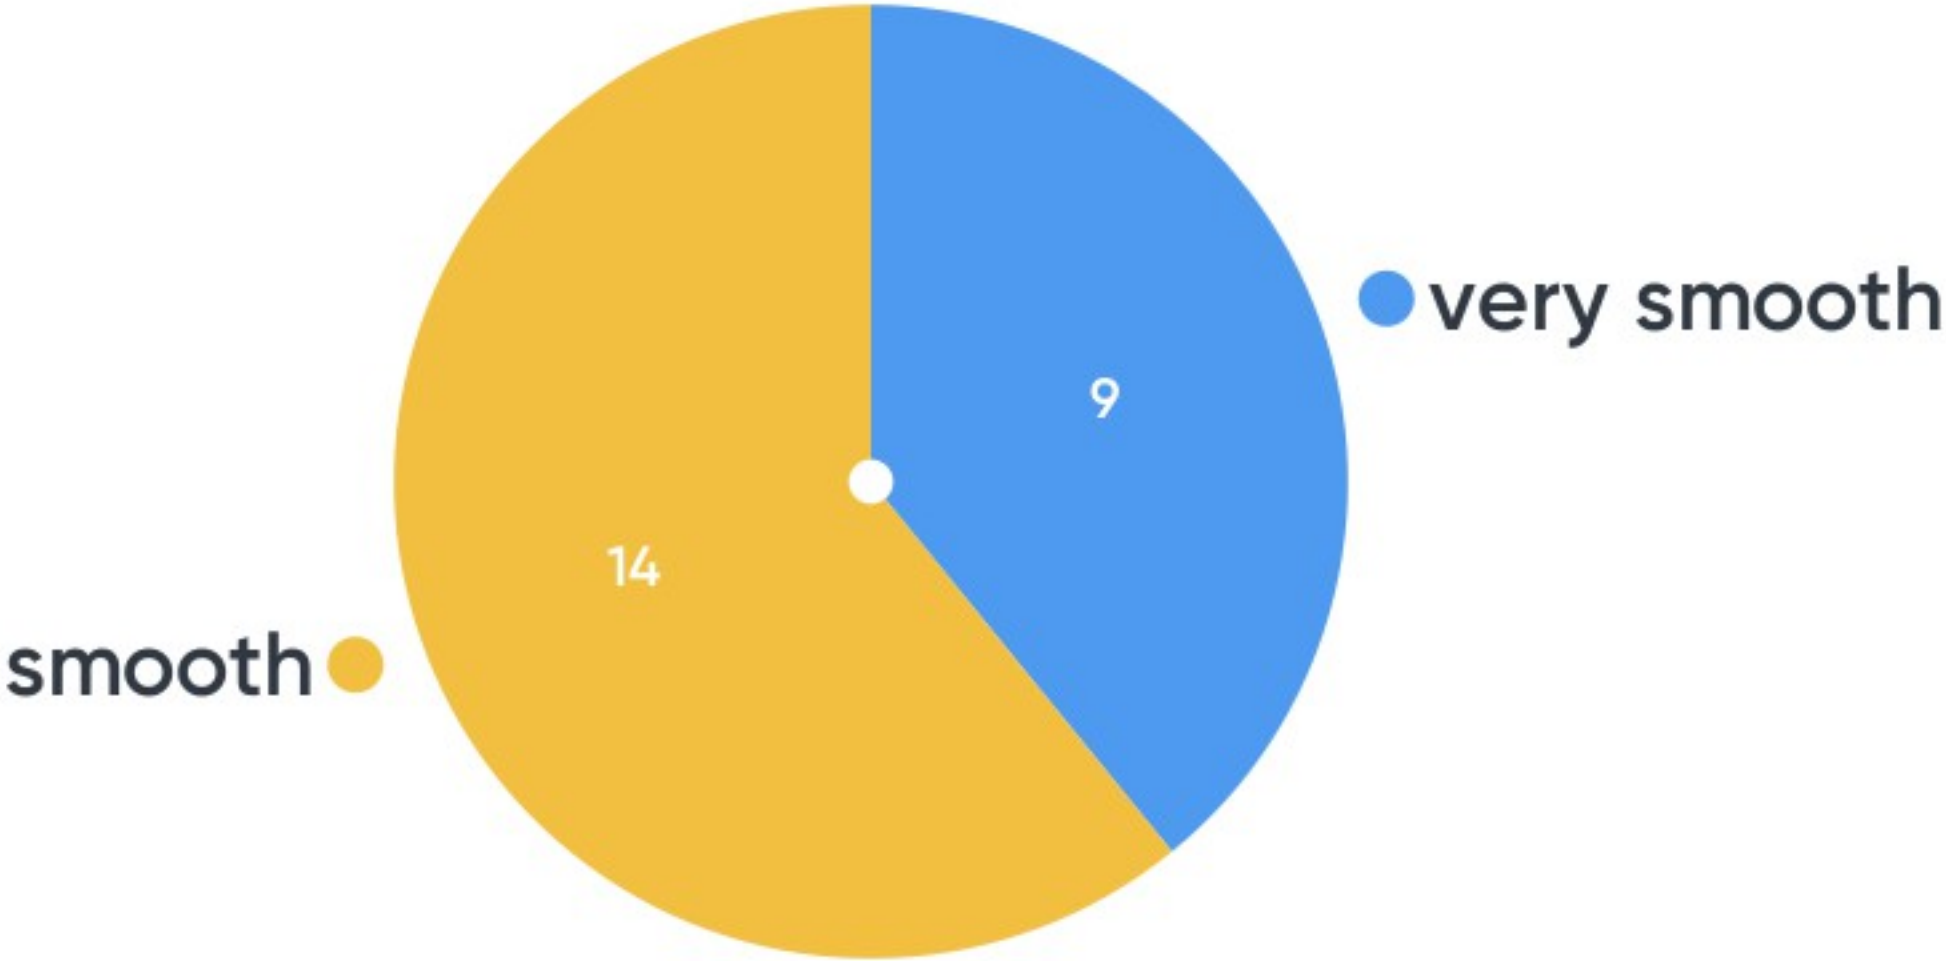

February 20, 2019

1. How was the image sharpness?

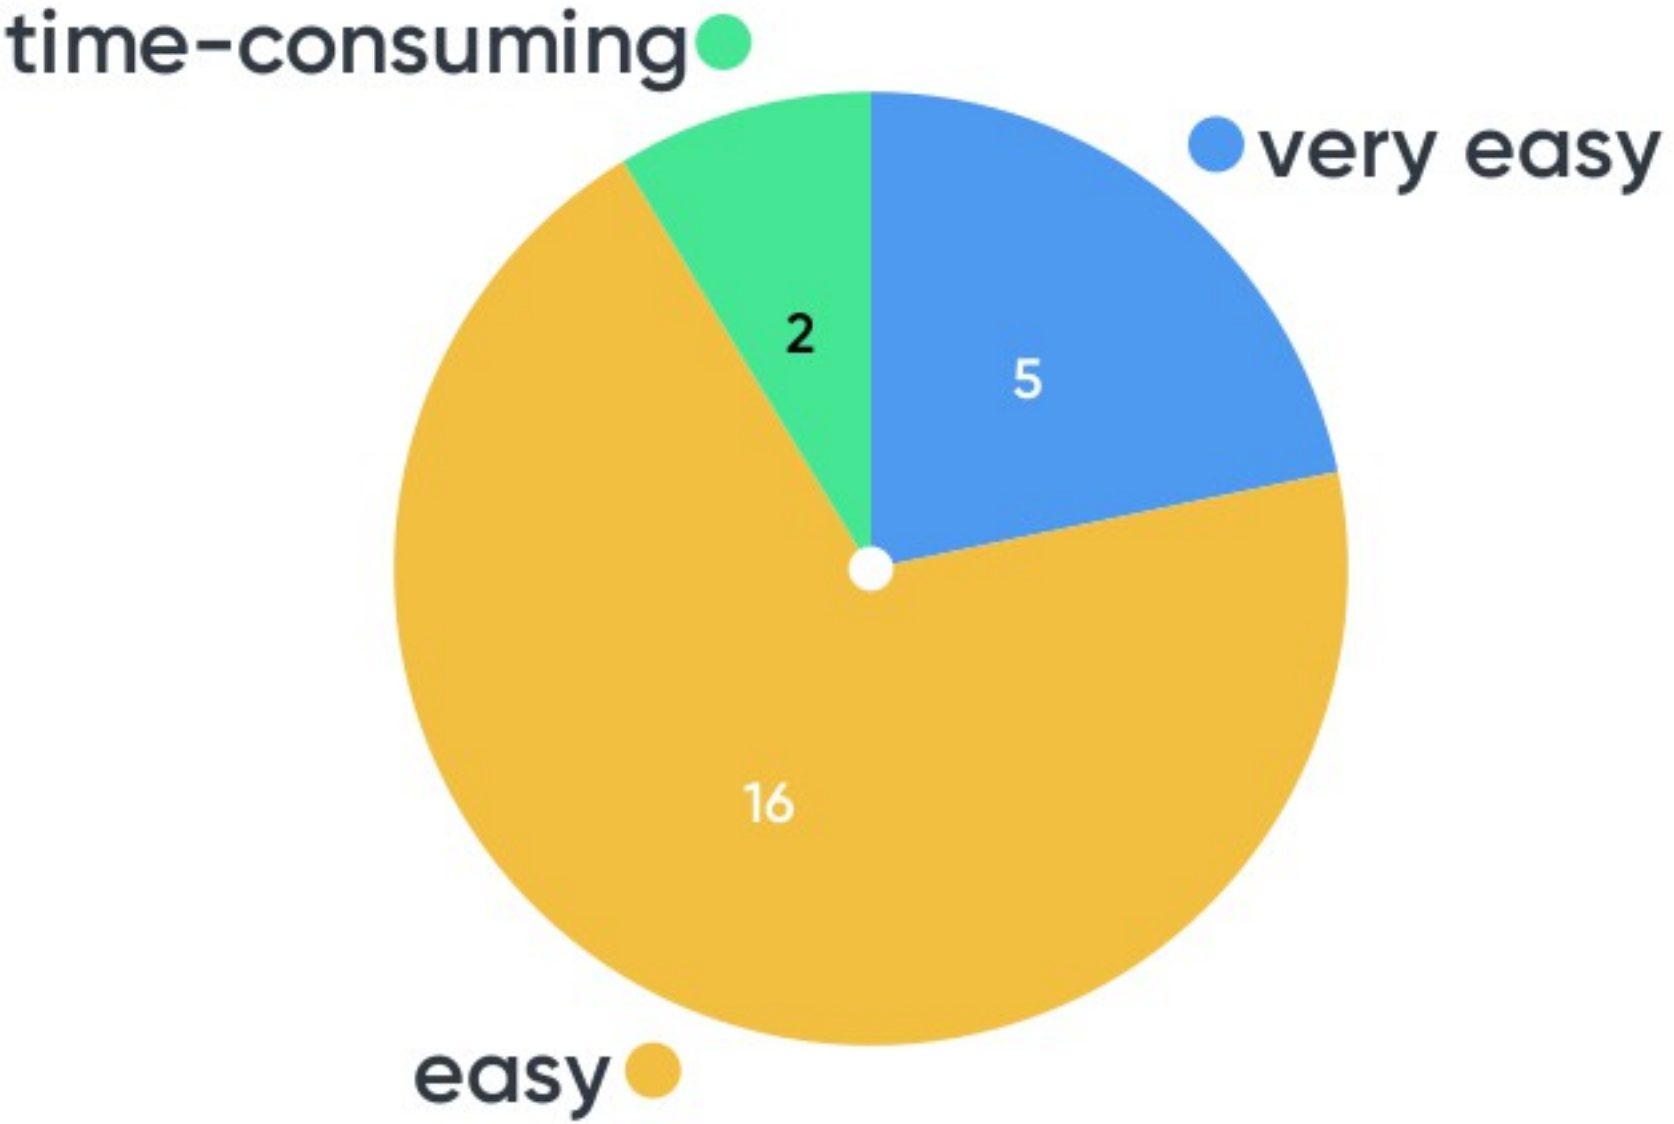

2. How was the image movement?

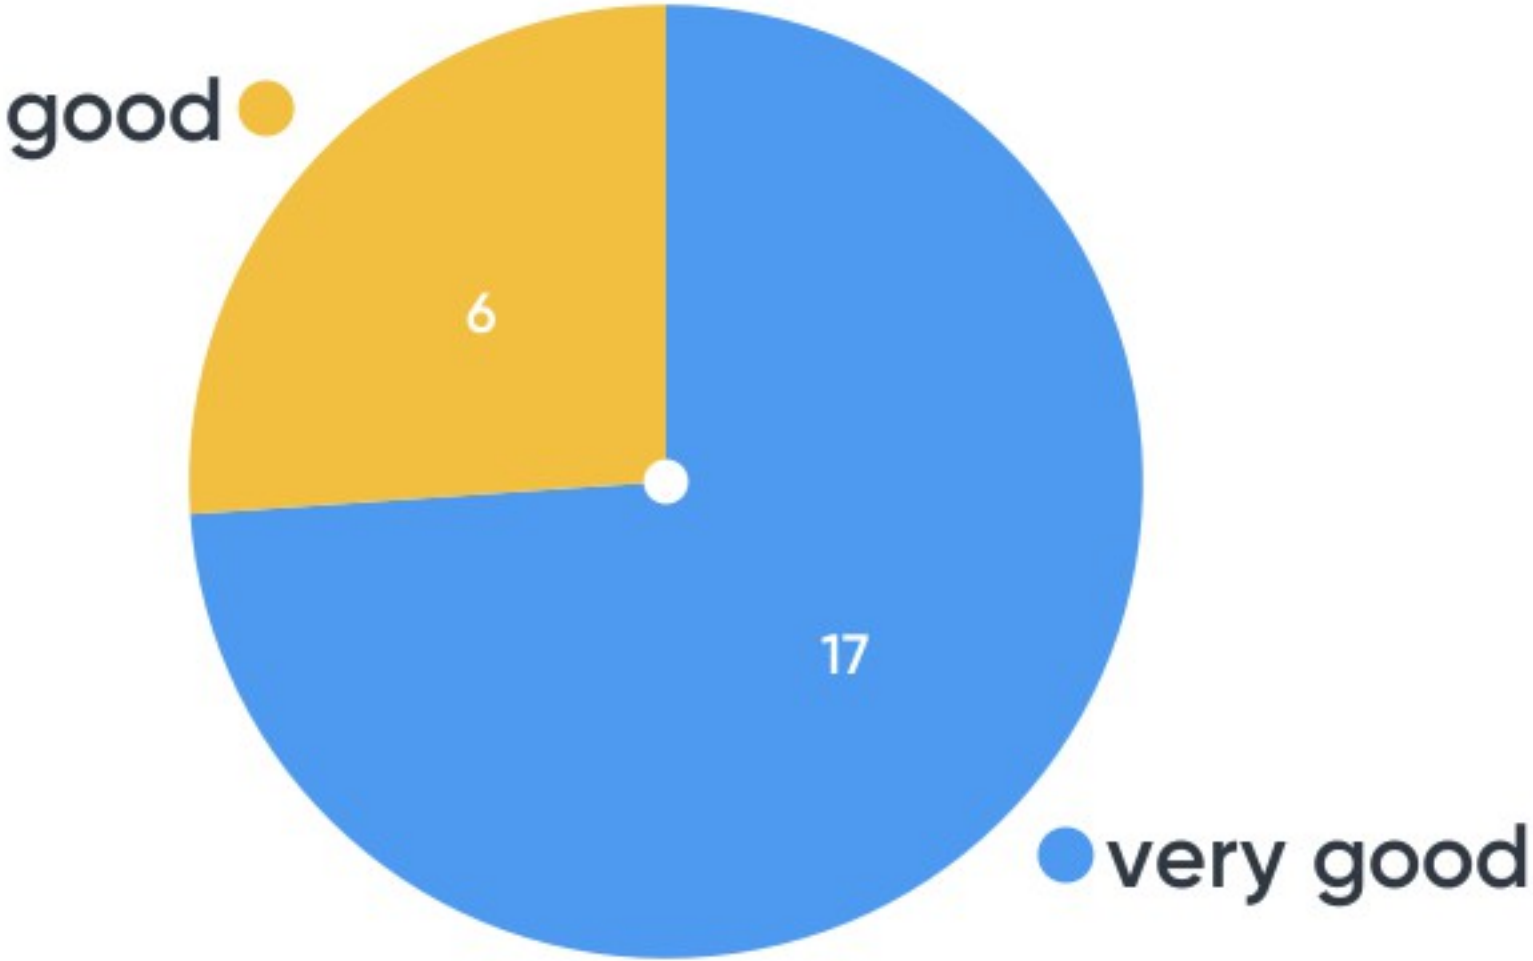

3. How was the quality of sound?

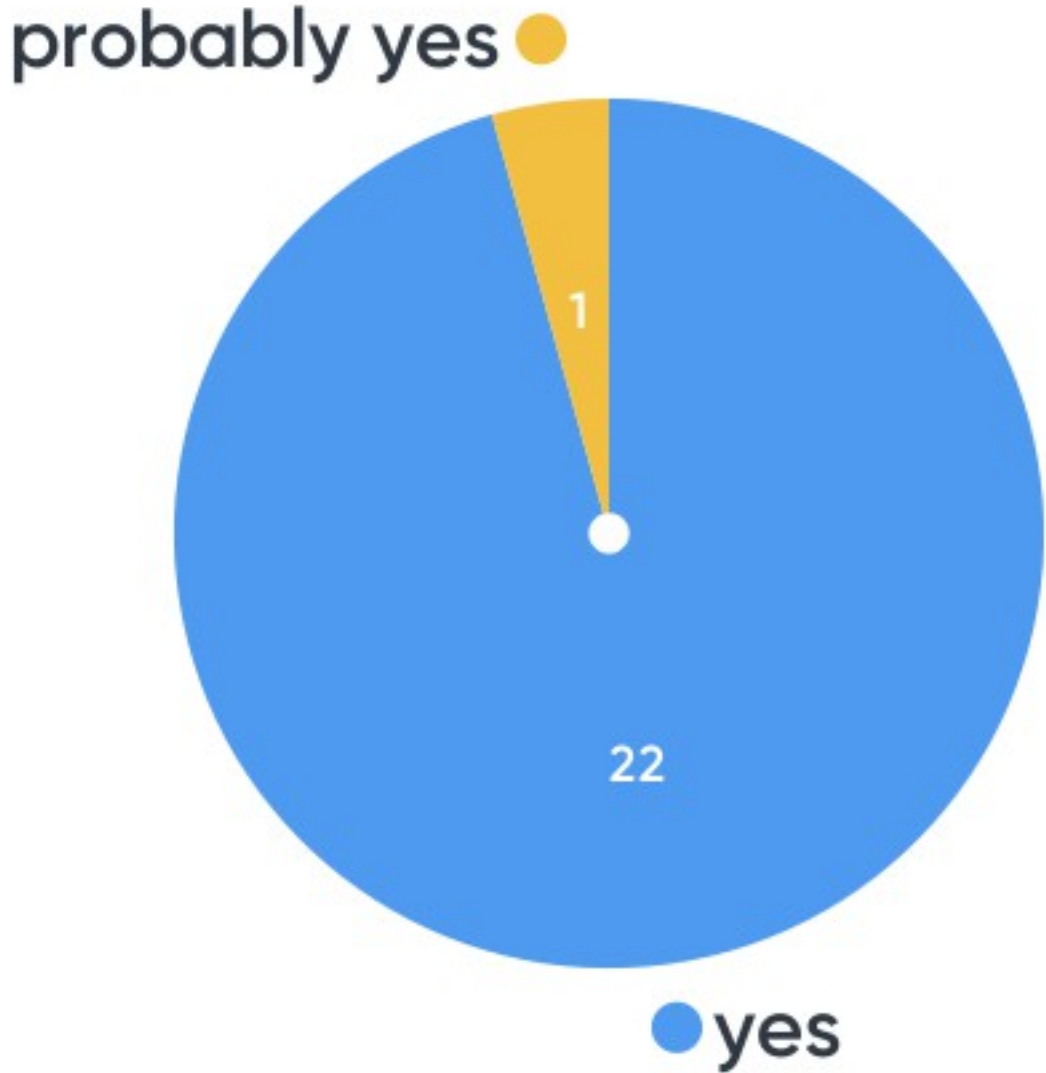

4. How was the preparations?

5. How was the program?

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

Program was okay, but there is echo from remote site which we cannot solve. But is acceptable

Echo problems from UM - Dr Ho microphone.. video is not so sharp

No comment

Audio is not clear from few centres

Excellent Session

Make a special app so that we can send questions to be read by the presenter beside from using the microphone.

Ok

Thank you for interesting session. Cases were very challenging but experts did their best.

Wireless microphone tends to give poorer sound quality and is often interrupted by loss of signal. The use of wireless microphone should be discouraged.

7. If you found any problems in teleconference, please write any comments you may have.

There were some noises during the conference. Sometimes, the images were pixelated.

episodic poor audio transmission.

Sound from Ummc was breaking or creating eco

There was echo at beginning; some centres did not mute their microphone

8. Which is your station?
