

# APAN46 - MIS-JIPMER session

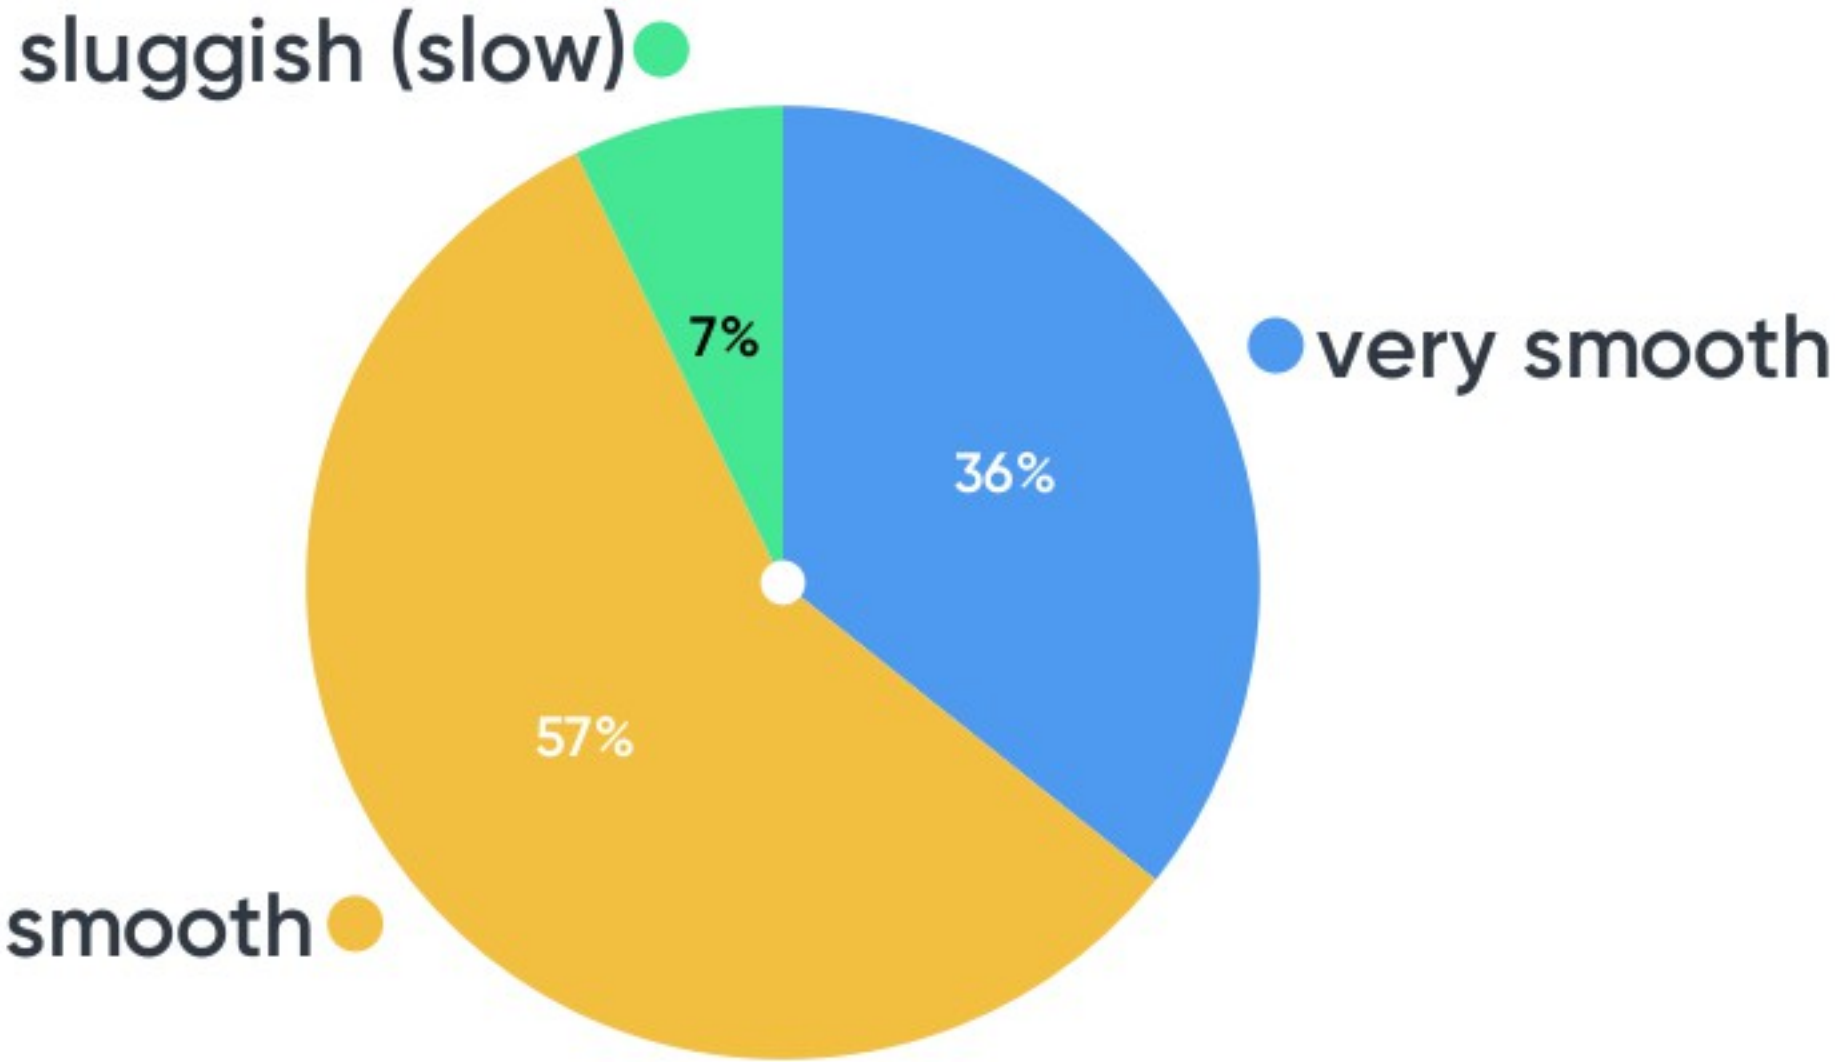

August 6, 2018

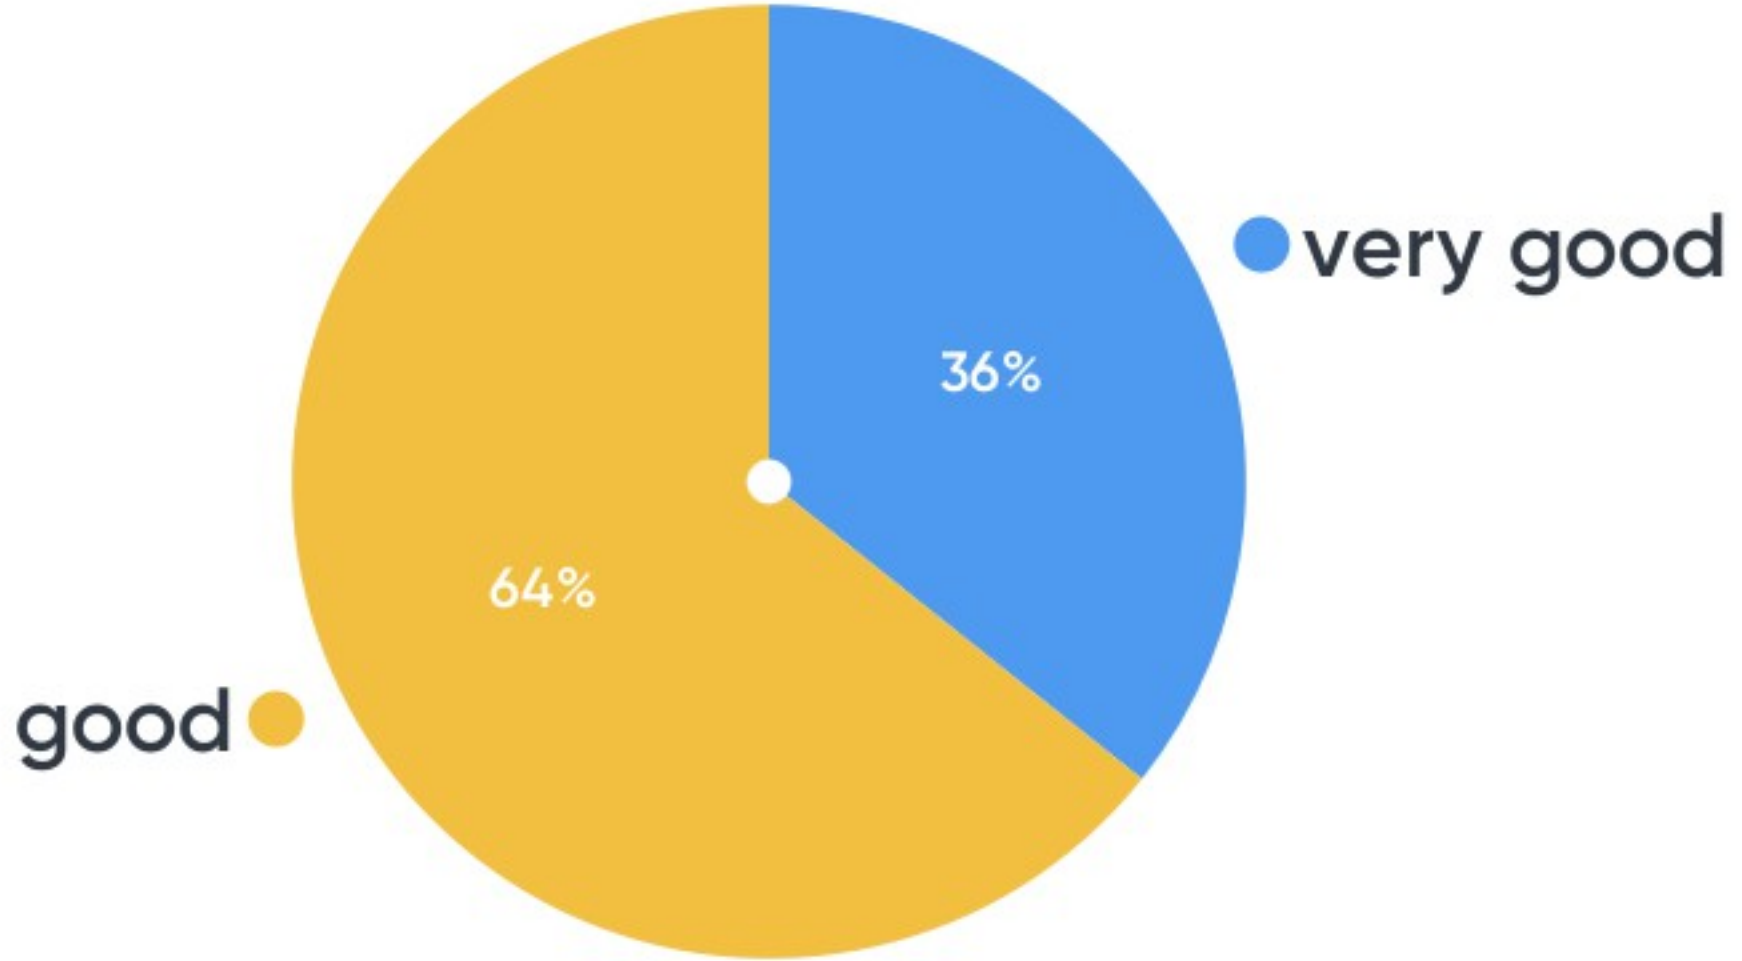

# 1. How was the image sharpness?

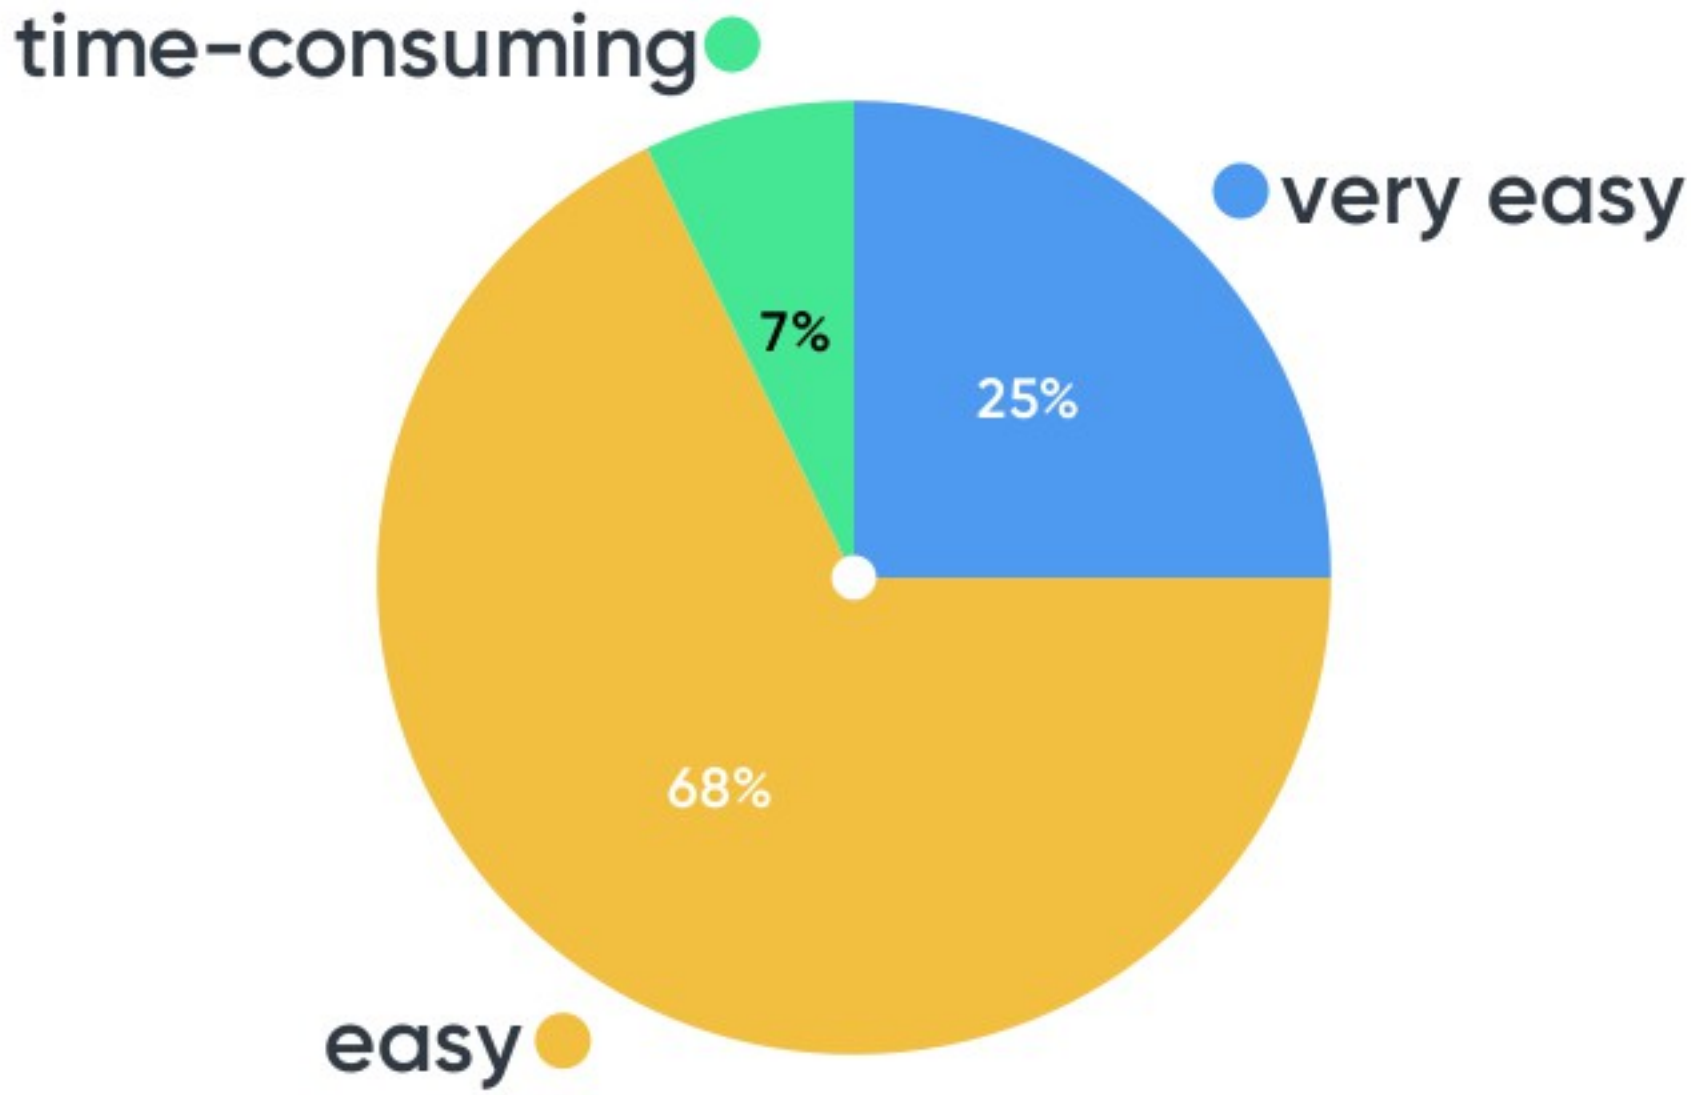

# 2. How was the image movement?

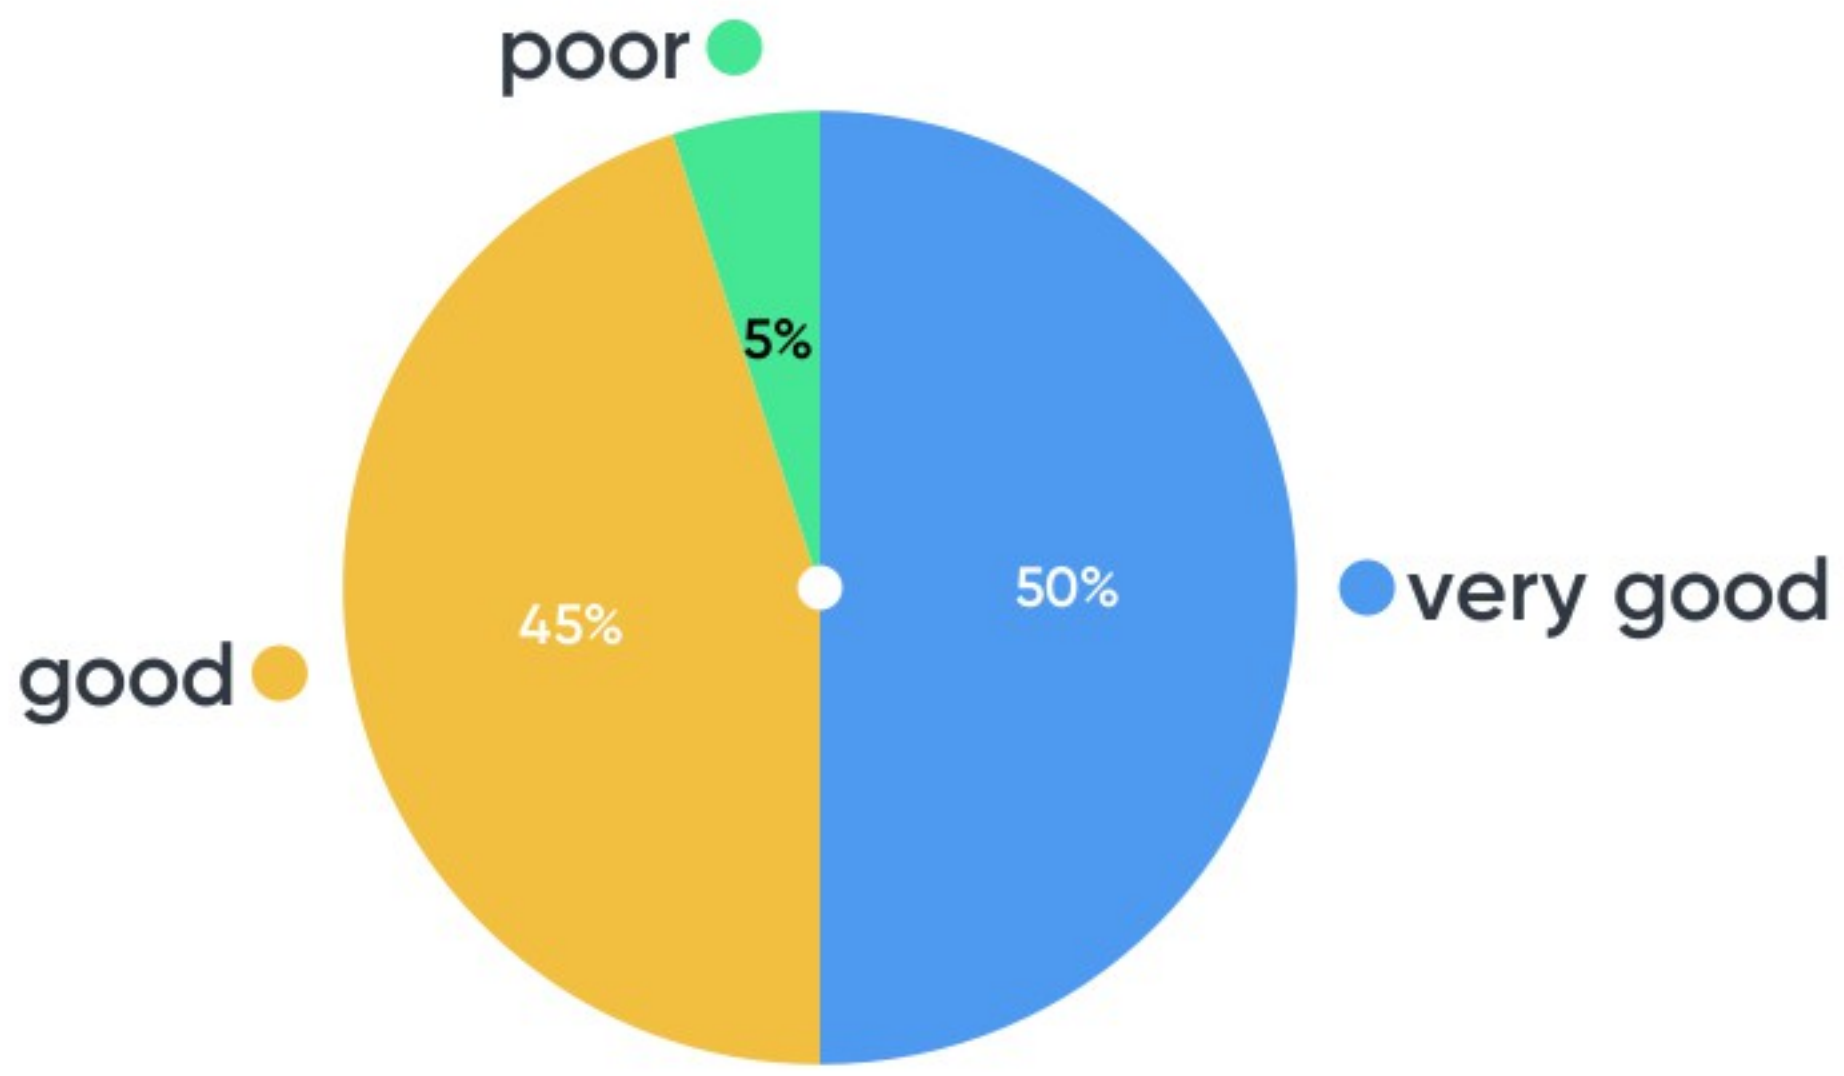

# 3. How was the quality of sound?

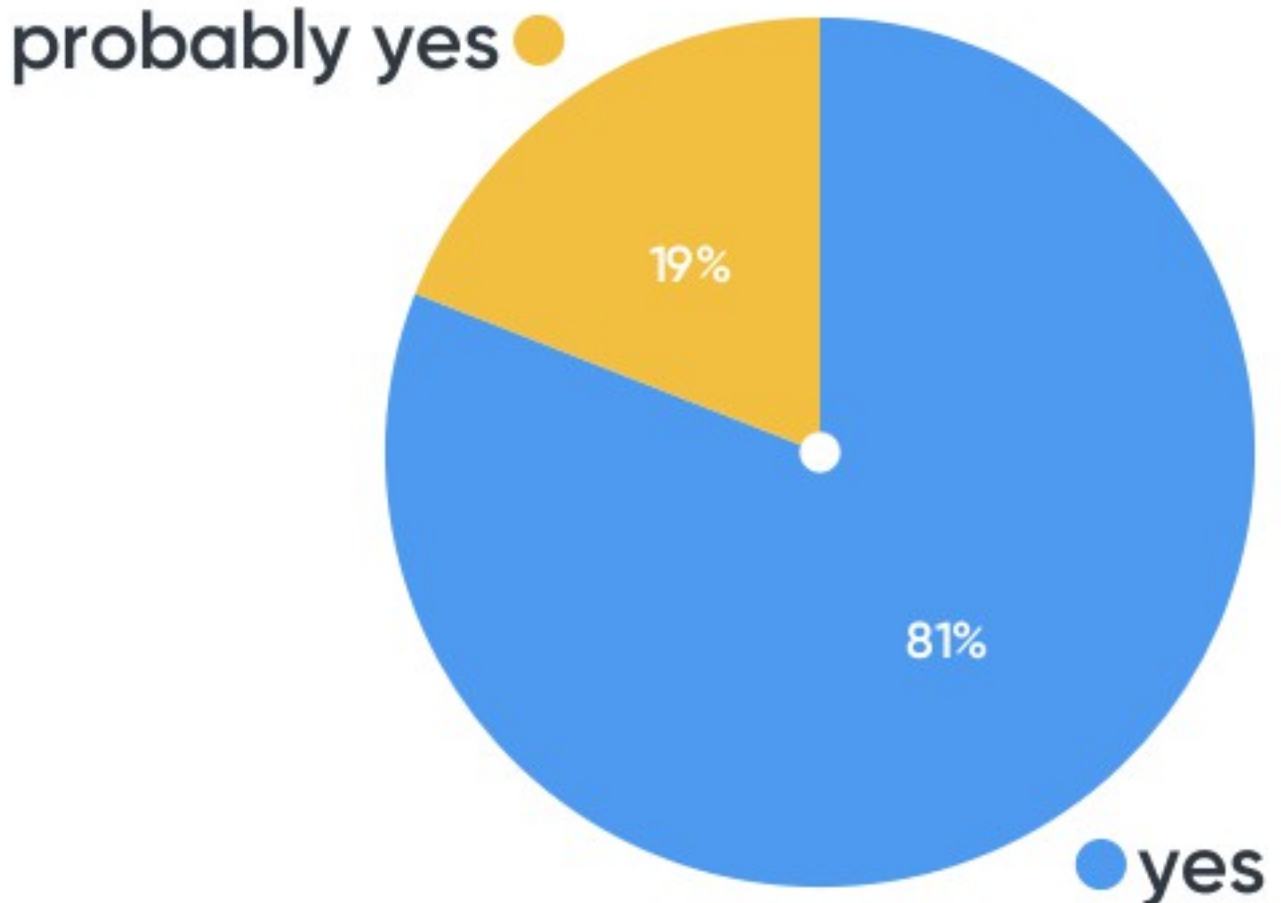

# 4. How was the preparations?

# 5. How was the program?

# 6. Will you attend another teleconference session next time?

# 7. If you found any problems in teleconference, please write any comments you may have.

-

No Problem. All the Session very clear

Not at all

I hope need more number of participants so that the teleconference should be more effective.

Some delay from some presentation

For the video clips with very fast movements, the quality of the video became poor. double speed is not recommended for video clips.

not any

As per our doctor Sanjay, he could not join because of his team case in operation theatre.

Nothing specific

# 7. If you found any problems in teleconference, please write any comments you may have.

i did not found any problems

The video quality degraded when the movement in the video was fast. Maybe it maybe better to have the doctors make the presentation files with slower videos

Overall the sessions were good

# 8. Which is your station?
