

APAN46 - Ophthalmology 1 session

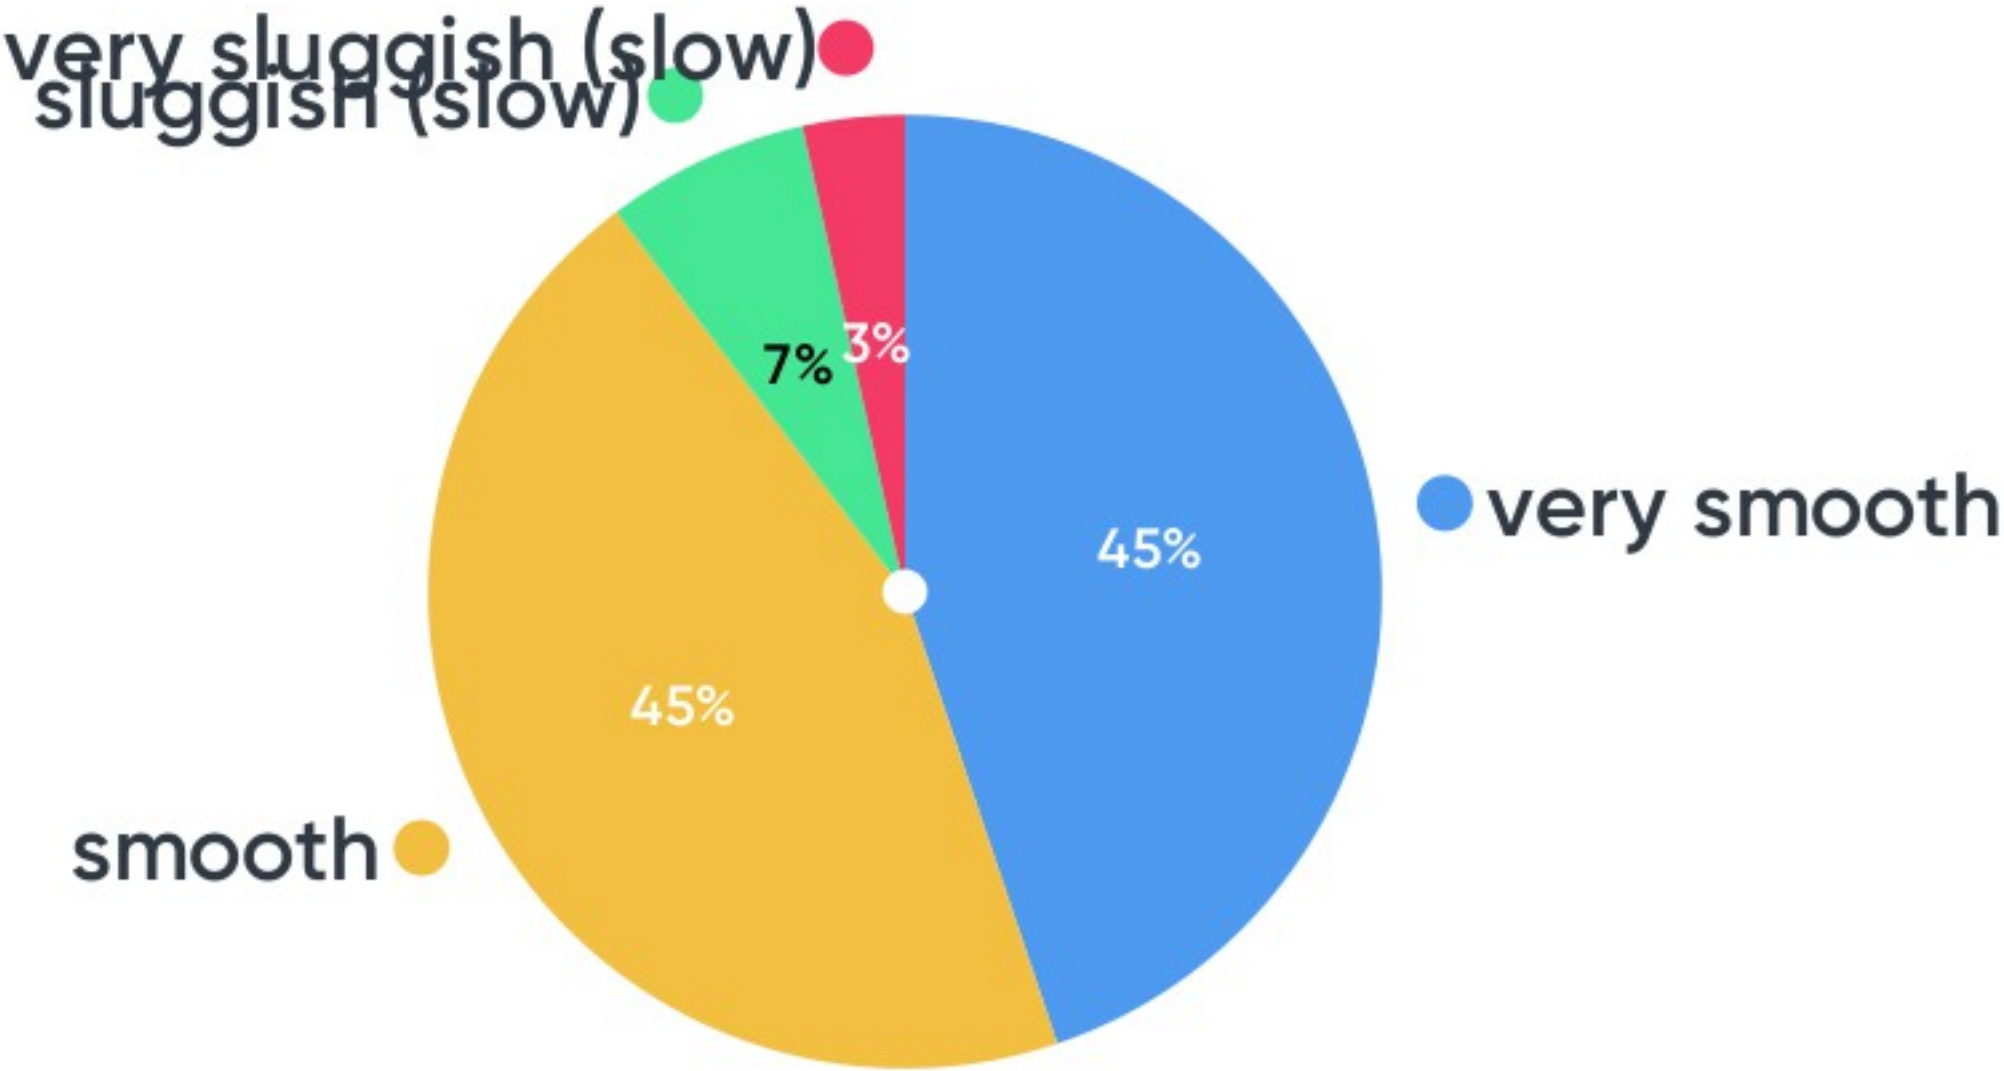

August 7, 2018

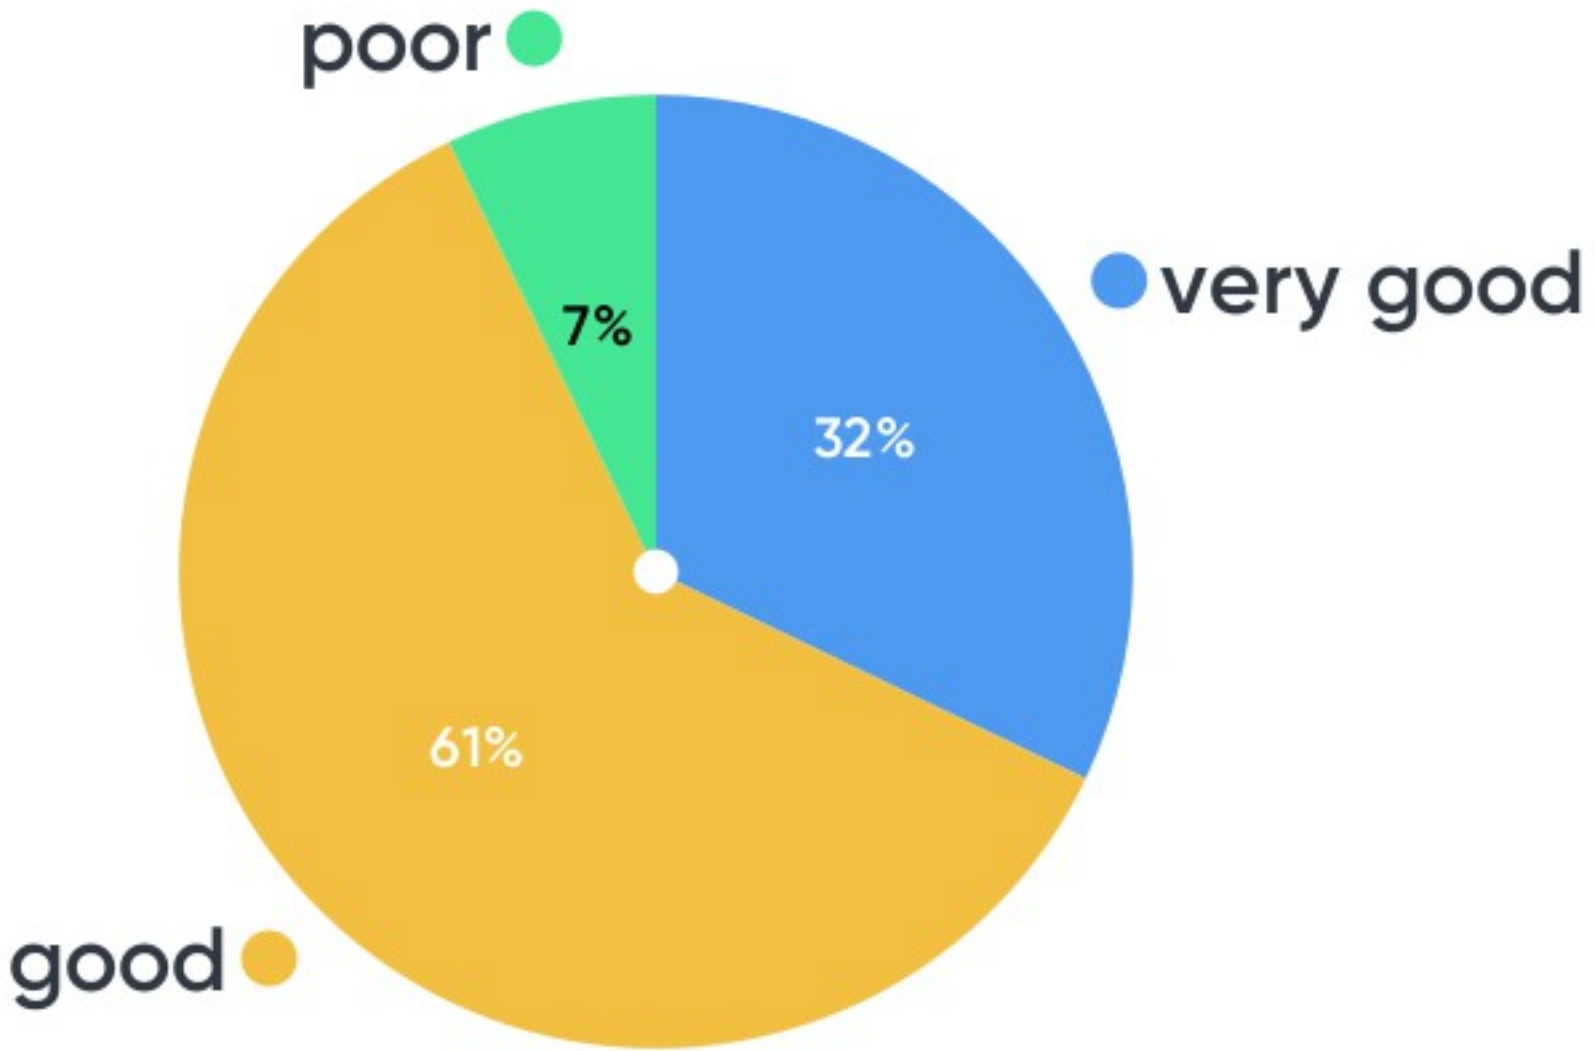

1. How was the image sharpness?

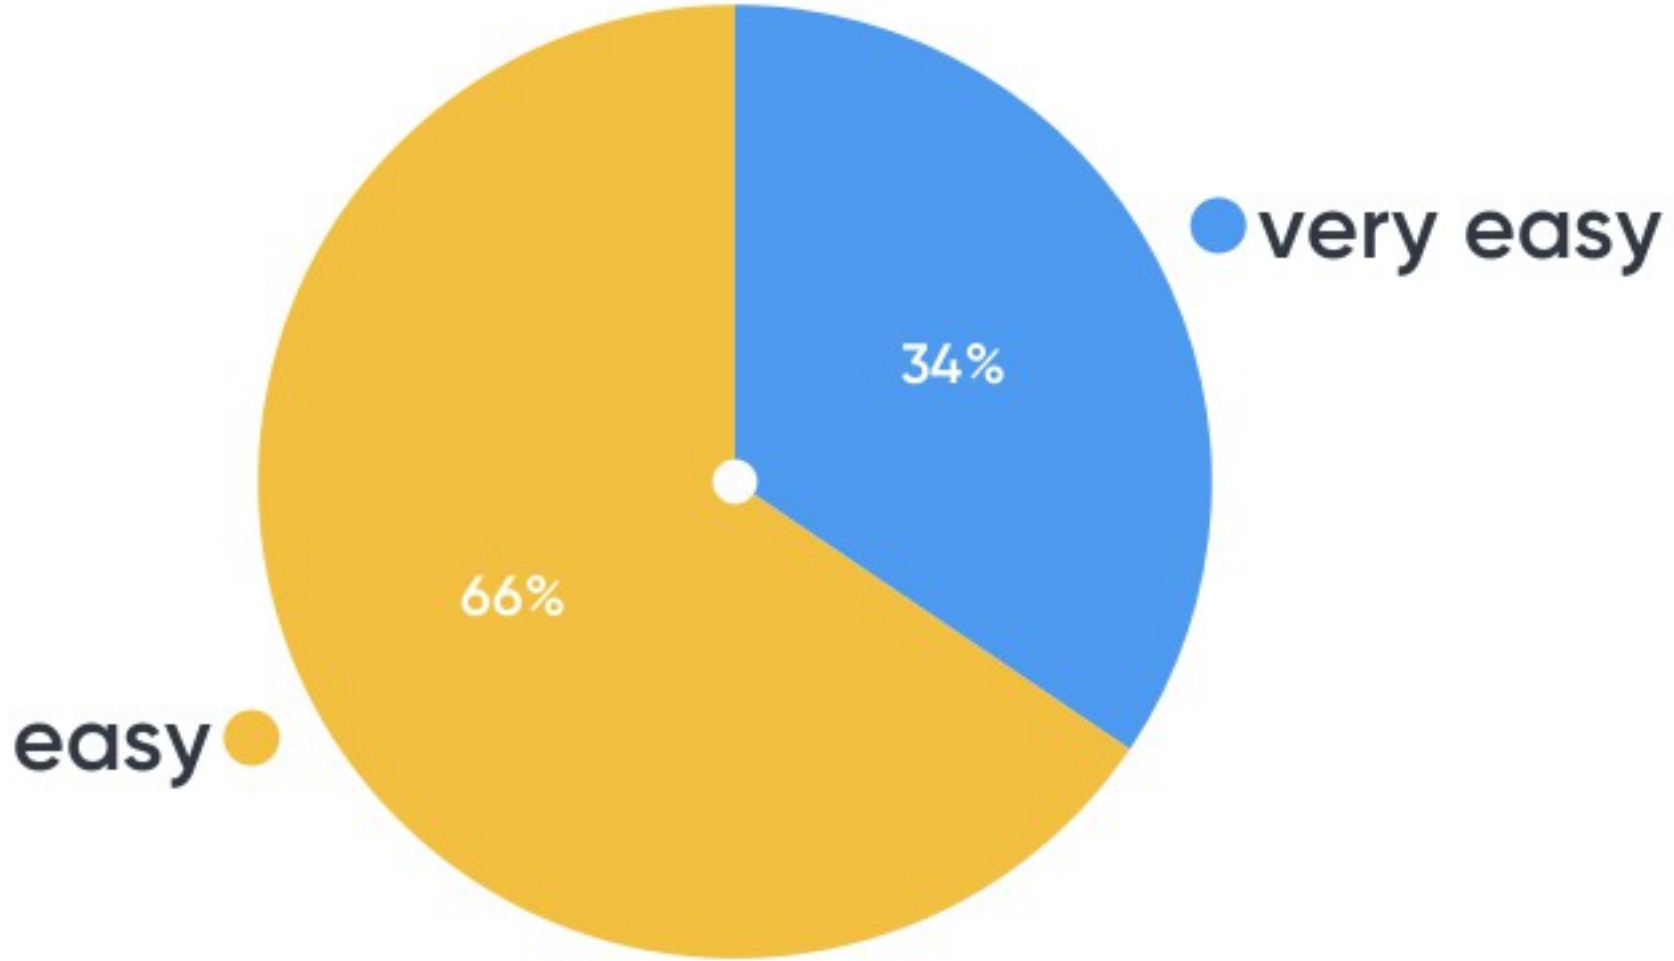

2. How was the image movement?

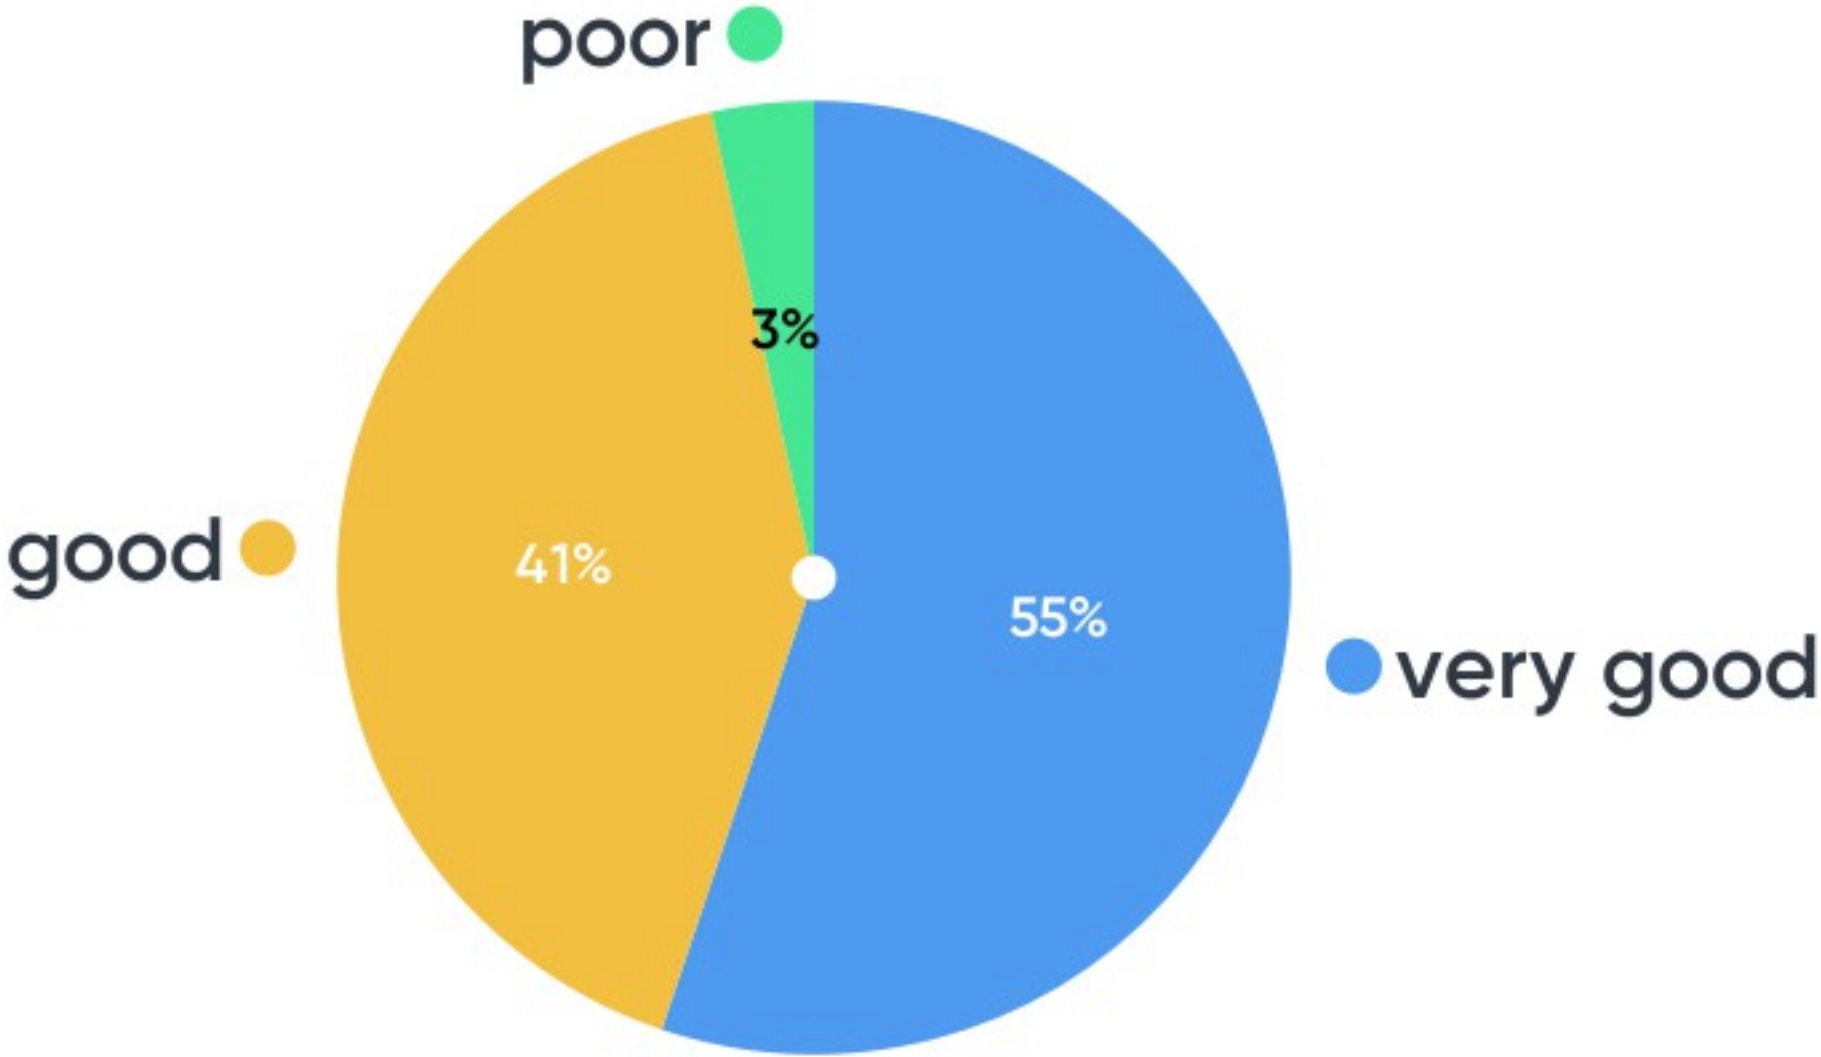

3. How was the quality of sound?

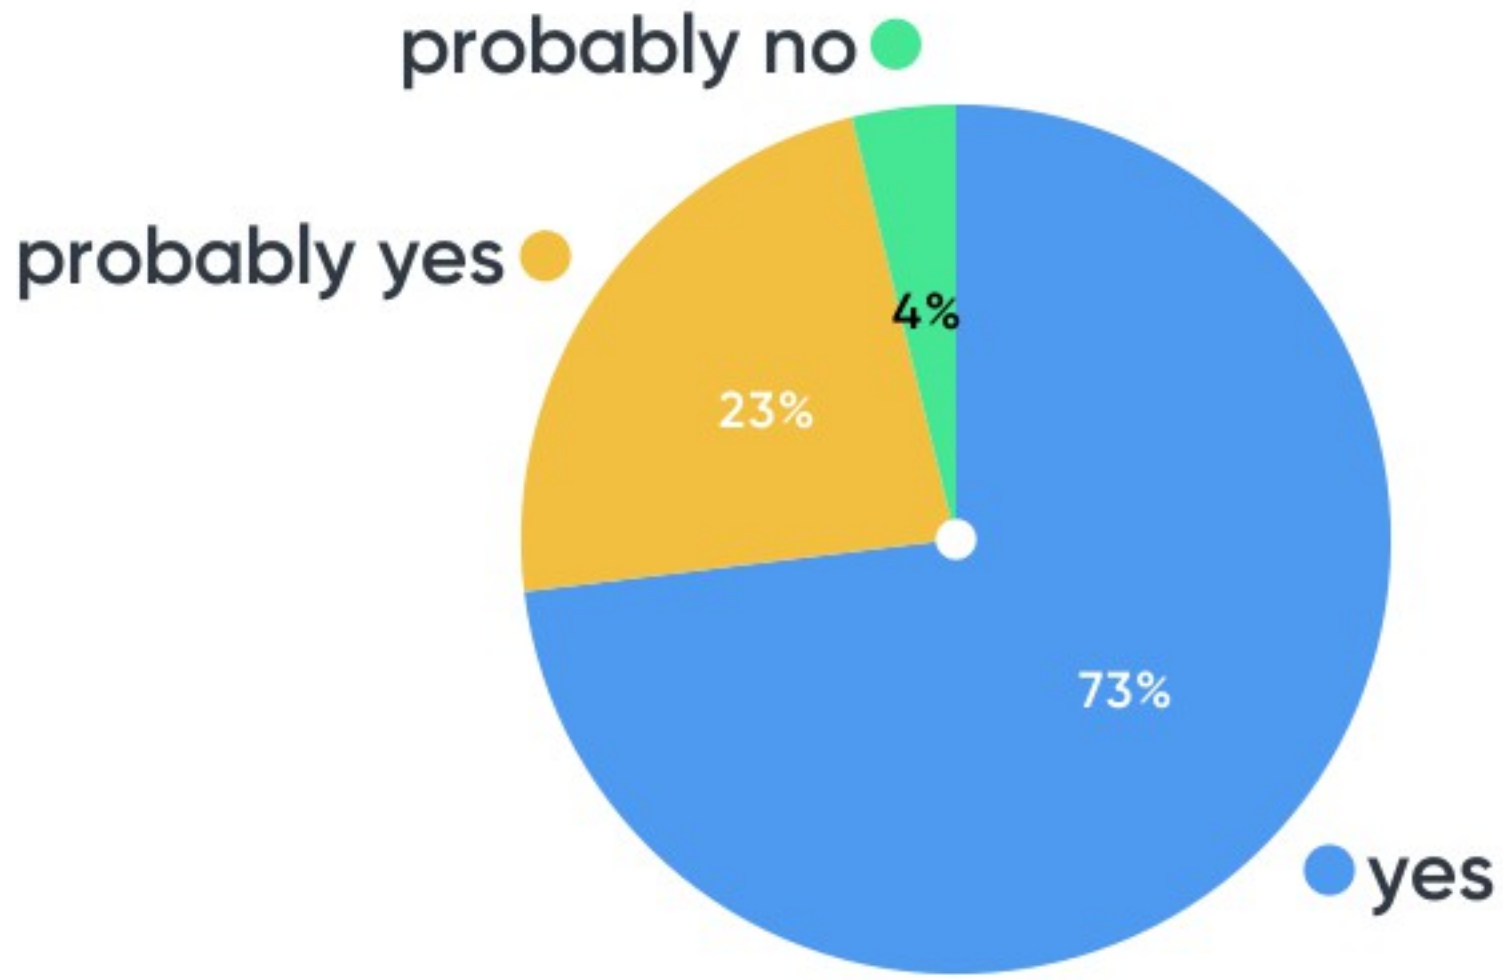

4. How was the preparations?

5. How was the program?

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

Technically fine, participation on remote seems not much active so any appreciation certification can help it to boost up.

Audio from Shankara Netralaya was not so good and lot of disturbance was there. Need to be addressed

some of institute has problem about the technical things due to absence of local engineer

Begging sound there is no issue. but end of the session we had a some audio issue,

No problem

Nil

Somehow attendance and interaction was not great . Technical (quality of image,sound) was of poor quality

minimal sound disturbance from other centers

It was good. Covered all aspects of AU. We made our residents participation. They are benefited and want to attend next session. Thanks

7. If you found any problems in teleconference, please write any comments you may have.

i did not found any problems

we, IT engineer(Technician) also require some training regarding this. So that better technical support can be expected for its smooth run

Speaker talk slowly.

It maybe my confusion with another session but the program started all the sudden without any introduction, so that was a surprise. Also, the font size of the presentation material where too small

not at all

The sessions are good.

Need to train users and participants about MIC and its cause echo which disturbs other.

There was some echo in few of the centers.

Wonderful!

7. If you found any problems in teleconference, please write any comments you may have.

No problems

superb

8. Which is your station?
