

APAN46 - Rural Healthcare session

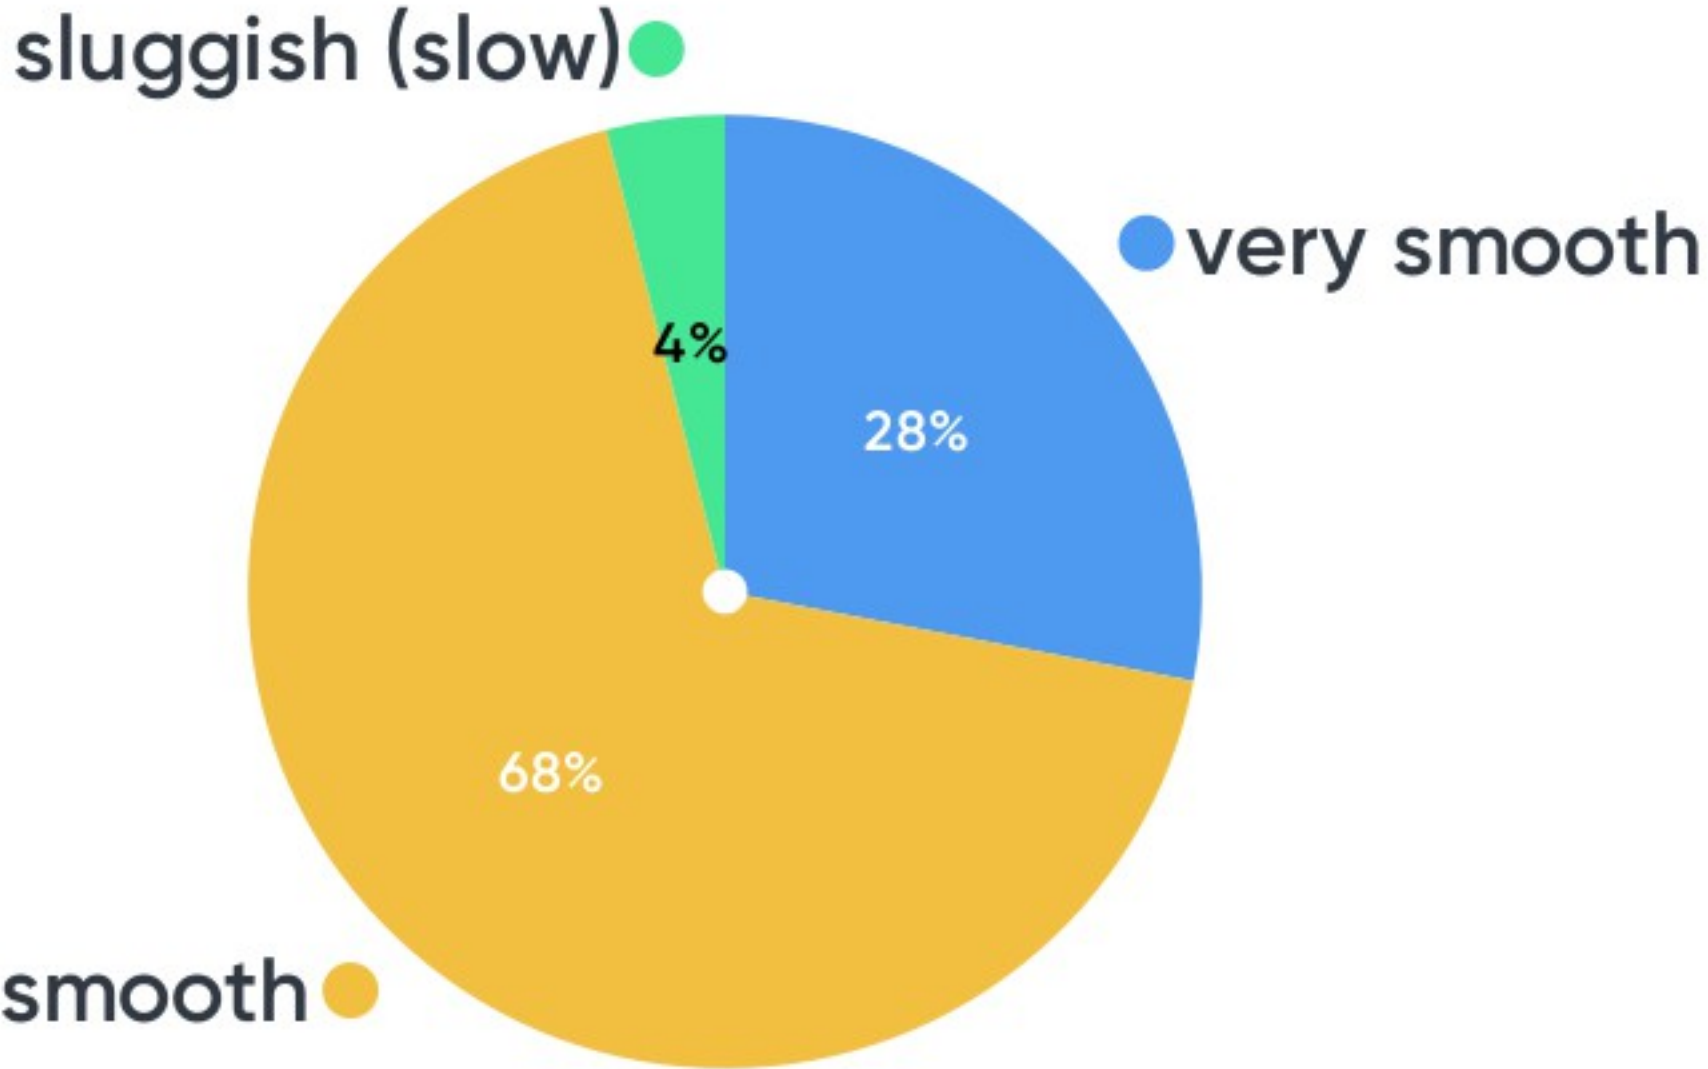

August 9, 2018

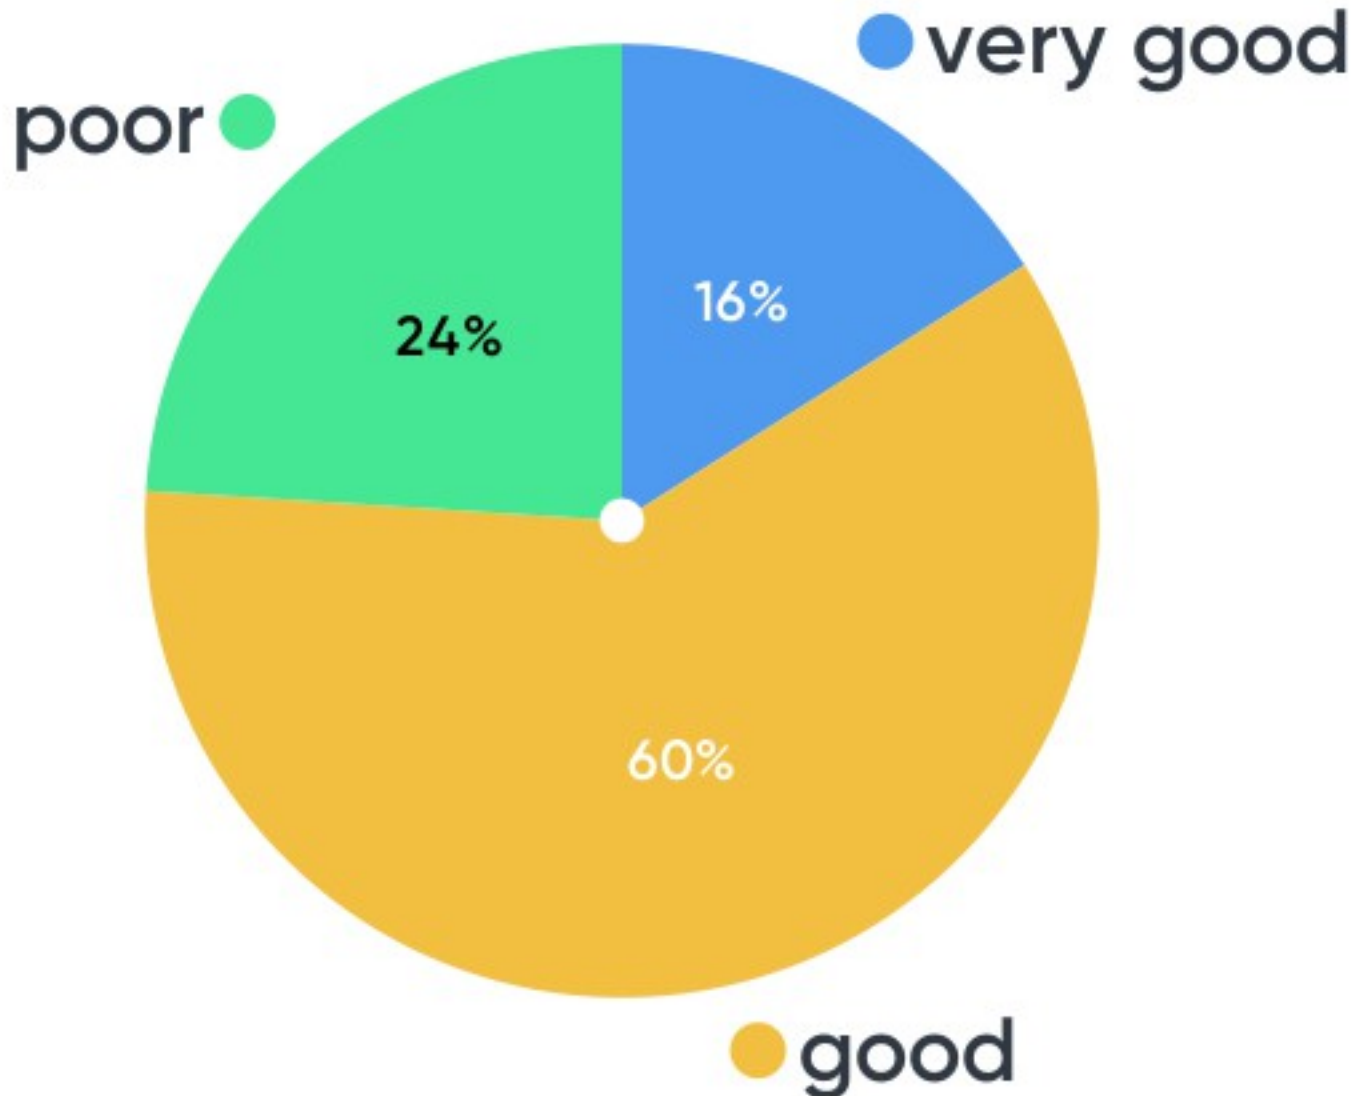

1. How was the image sharpness?

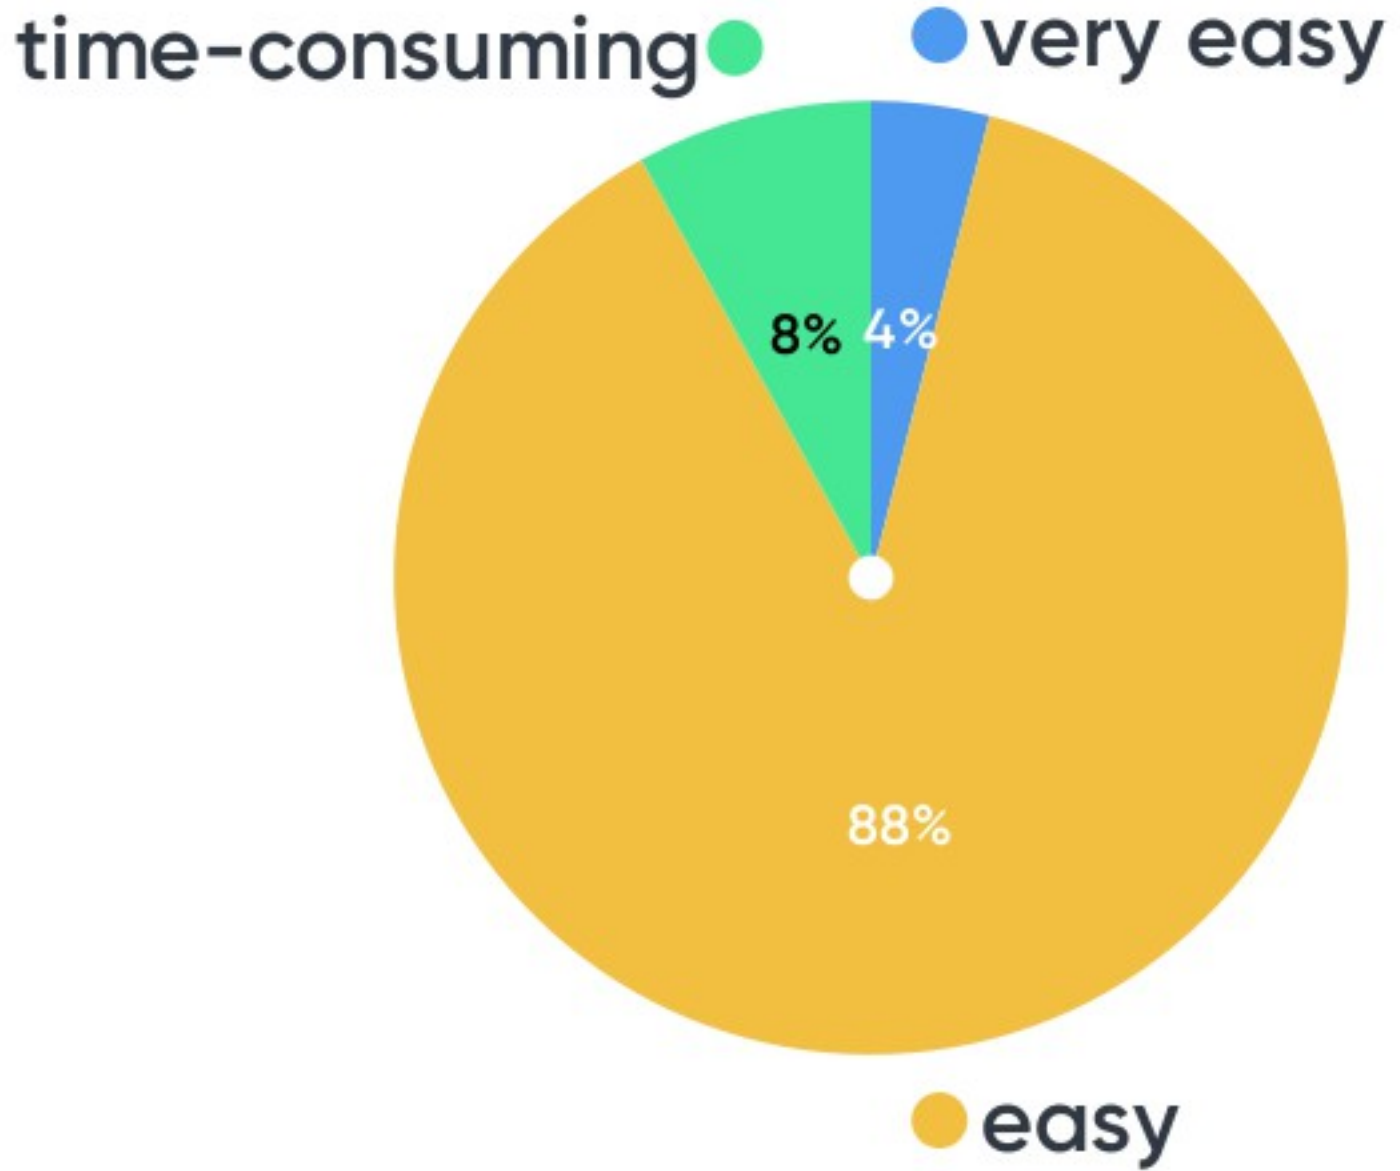

2. How was the image movement?

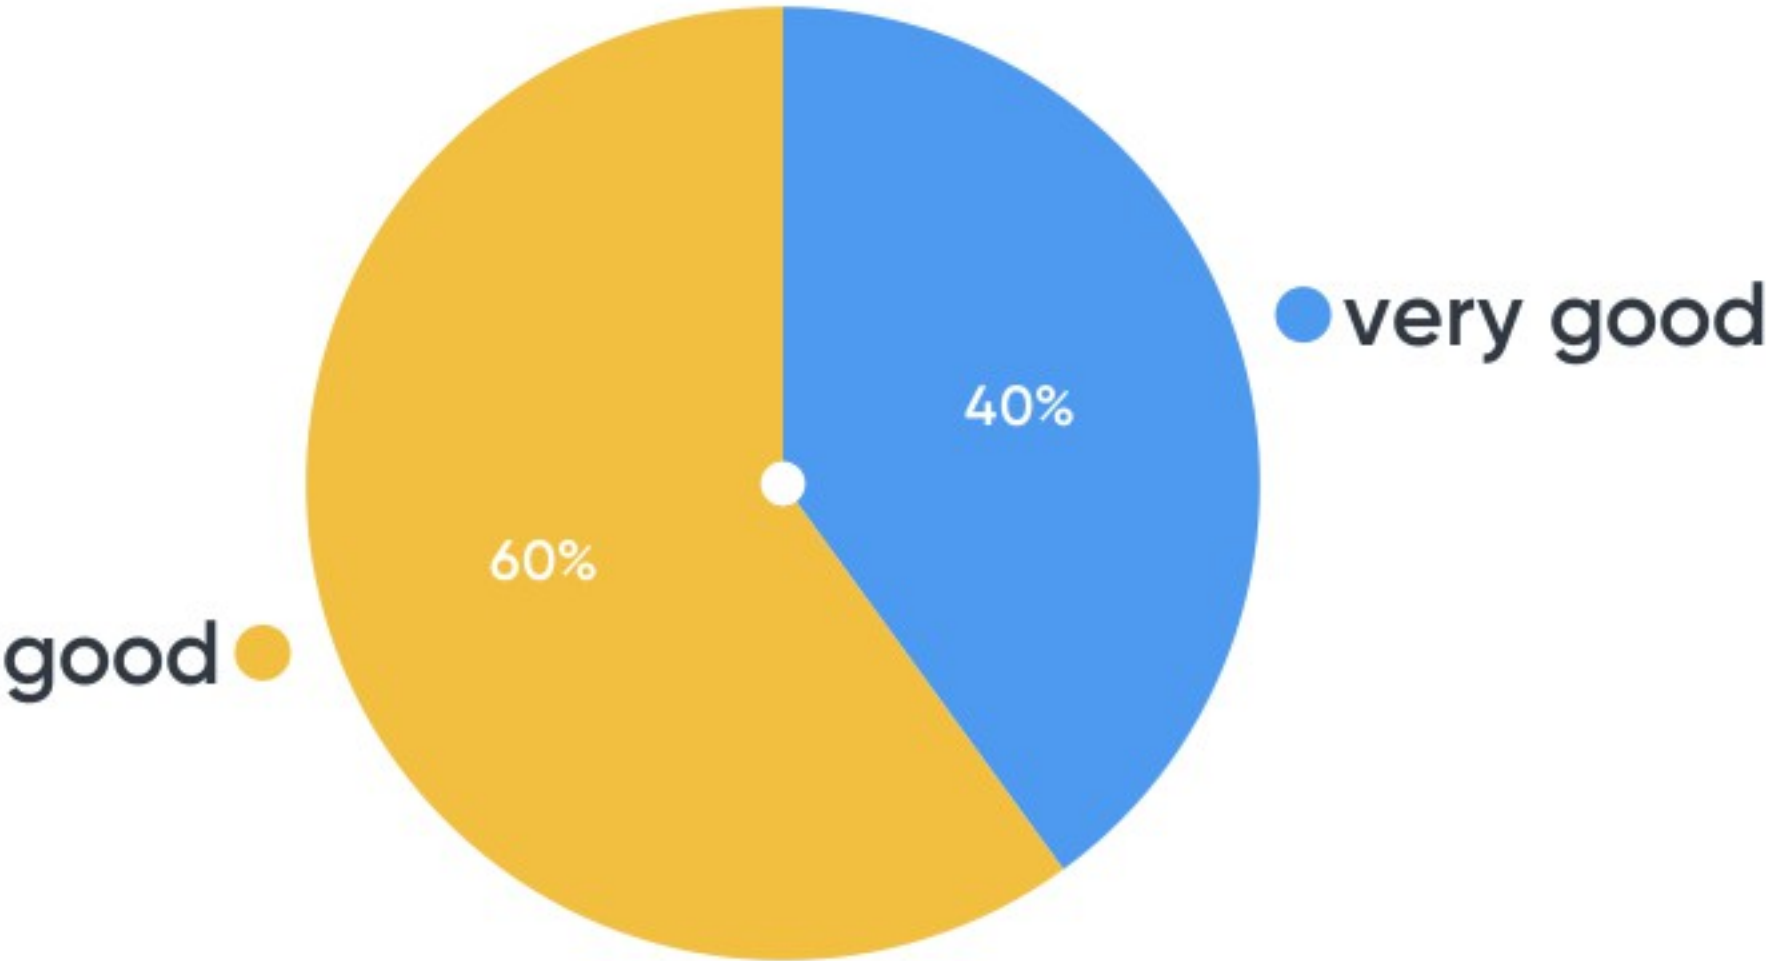

3. How was the quality of sound?

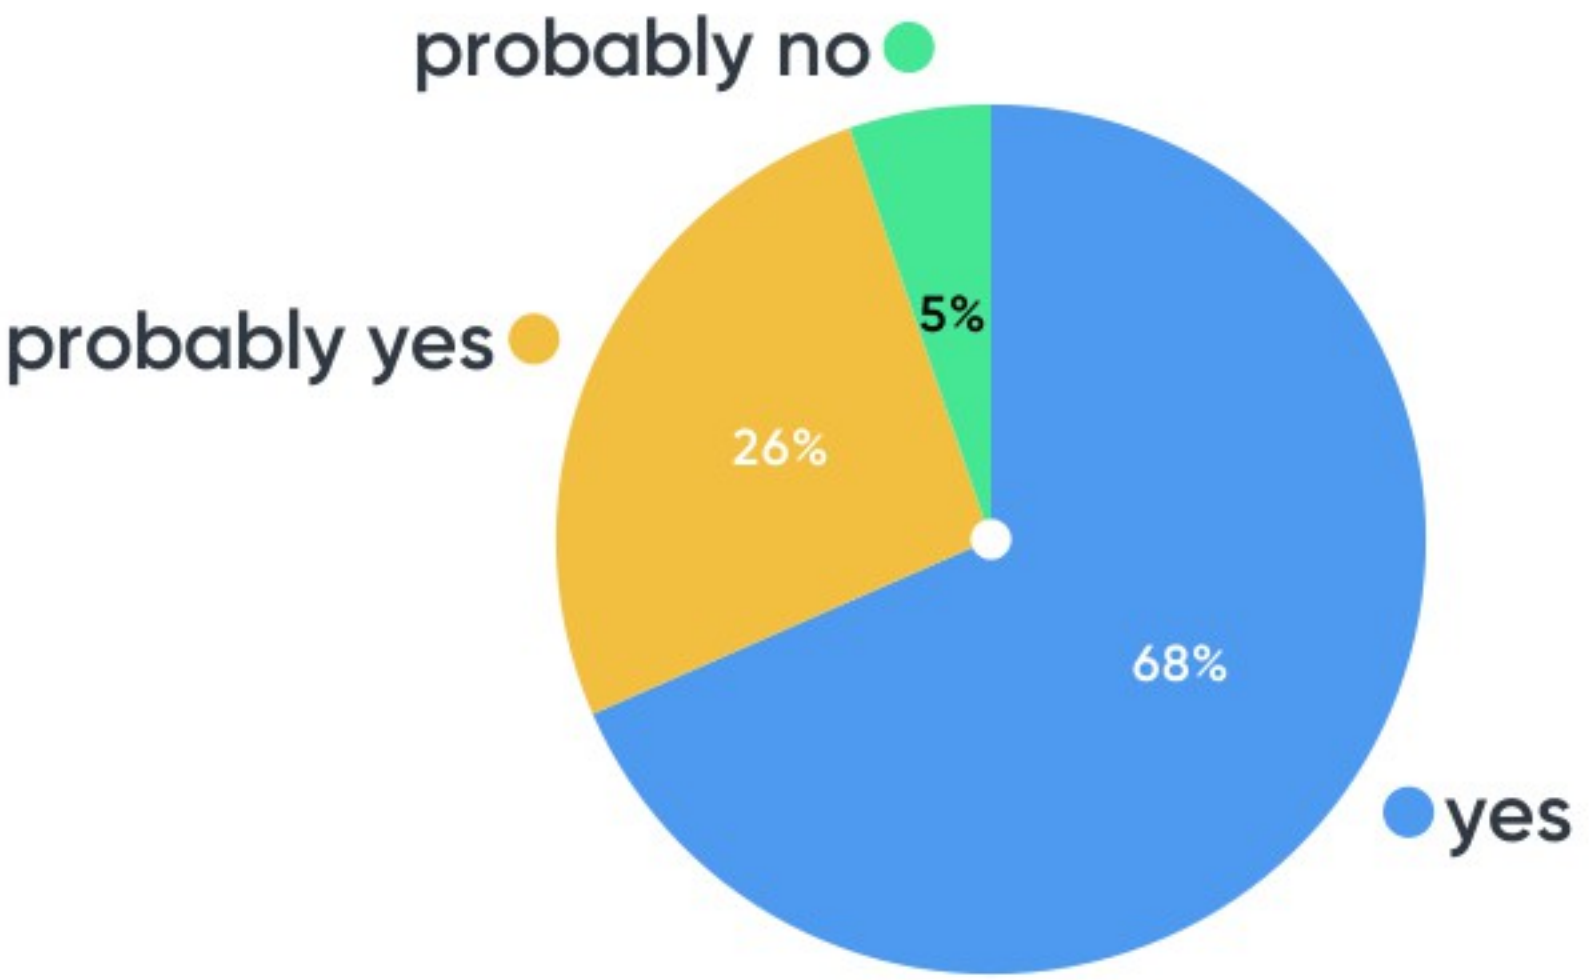

4. How was the preparations?

5. How was the program?

6. Will you attend another teleconference session next time?

7. If you found any problems in teleconference, please write any comments you may have.

as always getting presentations and video at the last minutes and no engineer at some local sites were the main problem we faced

Some times there was a problem with audio

Still Participant has sound and echo issues so need to guide them with tutorials and guidelines.

Audio from US some time audion muted from kmh

we didn't face any problem during the session.

Audio is not good from other sites..

Don Marcon Audio was noise. one presentation sharing problem, may be a operational problem.

Prepare the content focus only to application of telemedicine in rural health care

The audio did not seem to work at times

7. If you found any problems in teleconference, please write any comments you may have.

there was problem in sound

As usual some echo was found and sorted out in no time.

No problem

I had done a successful pretest prior to the conference. before the conference changes were required which included how my presentation slides were to be managed, no audio on the video clips that I had provided.

I had difficulty in connecting conference due to internet connection issue. Sometimes, the speaker's words are not audible.

enumerate session house rules before starting session (e.g. microphones should be turned off)

8. Which is your station?
