

Simone Astuni has been a pioneer in the video space working for cutting edge technology companies throughout his career. With a masters degree in Computer Engineering from Illinois Institute of Technology, Simone joined a startup company focused on the transmission of HD security video streams over wireless backbone networks for vertical applications including education, industrial and government. Simone joined Vidyo, the company that disrupted the video communication and collaboration industry with its software based platform that integrates with 3rd party applications and performs brilliantly on commodity PCs and mobile devices, in 2011 where he has designed and architected many innovative solutions for the healthcare, education and enterprise markets in capacity of Sales Engineer. Currently, Simone manages and supports the Sales Engineering team for the Asia Pacific region from Vidyo's Hong Kong office. His passion for innovative solutions to real-world problems using Vidyo technology is driving successful customer outcomes throughout the region.
