# Previous APAN e-Culture Achievement

# Collaboration in Wikiway

- Wiki as a social medium: Wikimania 2007, Taipei
- Utilizing wiki as connection glue for various innovations
- Collective participation over wiki platform
- Multi-lingual, multi-dimensional scalability
- Example: Metavid + wiki = MetavidWiki

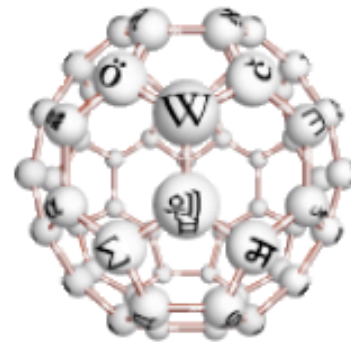

# Example: Metavidwiki

## Visual Overview of MetavidWiki

MediaWiki

+

SemanticWiki

+

1 The Archive: Browse a list you search by person name or by date/country/transition

2 Please find any video participant to call in external resources to this case campaign some make data from open sources is a failure

3 Video View -> Play selected clip

4 Video Control -> you jump to Arbitrary time in the stream

5 Sequence Builder -> Allow the construction of sequences of clips

6 Close Caption Seeker -> change the text appear for the selected clip

metavid v1

=

MetavidWiki

# Collaboration in Blog Way

- Function as the community building work to accumulate the individual's identities

# Example: GVO Lingua

## Project Lingua

Project Lingua seeks to amplify Global Voices in languages other than English with the help of volunteer translators. It will open lines of communication with non-english speaking bloggers and readers of GV by translating main GV site content into other languages.

Check out the [recently translated articles](#).

## A Little Background

Inspired by a workshop on Global Voices and language at the Global Voices 2006 Summit in Delhi, India, a group of francophone bloggers approached founders [Ethan Zuckerman](#), Rebecca MacKinnon and Taiwanese contributor [Portnoy](#) about starting a Francophone GV page similar to Portnoy's pioneering Global Voices in Chinese site. Other language communities expressed interest, and Lingua was born.

## Active Lingua Sites

### All GV Pages
